### **Projects:**

**Project Name** : **ESRI Service Cloud and Sales Cloud**

**Role** : Senior Salesforce Developer and Business Consultant.

**Project Description:**

I am providing as consultant and development support. I am a big part of ESRI service cloud by enabling the services for Australia, Indonesia, Malaysia, Belux, Canada, France, Spain, HNIT Baltic, UK, Muscat and Germany as global support distributor and customers by using Salesforce instances to manage the support cases, contacts and other support related-items. I cover the whole admin and customization (Apex) side.

Also updated the service cloud classic environment to lightning experience.

**Project Name** : **JCI - Power Solutions Distributor Communities**

**Role** : Senior Salesforce Developer.

**Project Description:**

I upgraded current B2B Customer Portals to a Global Standard. In which we cover B2B transactions like Sales Orders, Invoices and payments, Warranties and Complaints. We ensured full operational & functional connectivity to current JCI ERP's with Salesforce. JCI has different B2B applications which are operational in different countries. So we build couple of distributor communities that enhanced the operation of current operational distributor applications like that is running in Mexico and China.

**Project Name** : **Aeritae ( Mailchimp and Eventbrite Integration, KPI Report )**

**Role** : Senior Salesforce Developer.

**Project Description:**

Aeritae is a software consultant company that provides the consultancy and development to servicenow CRM. They are using servicenow and salesforce for internal company. I have centeralized

the customer data to the salesforce. Data comes from Mailchimp and Eventbrite. Sales rep can send emails to group of peoples via mailchimp that are intersted to join the regarding event.

I build the KPI report that helps to identify the sales of each sales rep within specific time period. Their manager can find out performances of each sales rep and can make performance increment of current year.

Project Name : **RWC - Reliance Worldwide Corporation Limited**  
Role : Senior Salesforce Developer.

Project Description:

RWC is a global provider of water control system, plumbing solutions for domestice commercial and industrial applications. I have integrated RWC's SQL database with salesforce by using ETL ( Talend ). This facilitate salesforce administrator to generate the reports on the base of integration data.

Project Name : **Aramark- Innovation Community**  
Role : Salesforce Developer.

Project Description:

Aramark provide the enhancement services in different businesses like in Foods, Education, Hospitals and etc. We build a community for internal users that can share own idea with multiple attachments according to customer demands. And read the other's ideas and rate them according to his weightage. Decision makers and even internal users can see his idea in home screen. Top rated ideas always show up on top of the page.

Project Name : **Honeywell Day 2, CPRO**  
Role : Salesforce Developer.

Project Description:

I have integrated the HoneyWell ERP system with salesforce. Where I exposed salesforce REST API that had inserted or updated the devices information according to ERP data in salesforce under each relevant customer record.

I worked on Honeywell CPRO portal that helps to contractors to manage thier employees, customer and finances. Customer were grant their devices access and then contractors employee can troubleshoot devices issues.

Miscellaneous Projects : **Ecolab Pest, ATHENE, MARVIN, AIMIA, Cargill, Heroku Integration.**
