CAREER OBJECTIVE

To provide Software Quality Assurance, Verification and Validation services to Information Technology Industry and to deliver reliable and quality output on time by using skills and experience.

PROFESSIONAL SUMMARY

Software QA Engineer with software testing lifecycle experience includes designing and implementing test scripts, test scenarios, test cases and test processes with Automation/Manual testing for Web & Mobile app.

- Having **3 years** of experience in **Software Testing** as experienced in:
- **Web Automation** using **Selenium WebDriver** with **Java**
- Experienced in **TestNG** , and **Jenkins setup**
- **Mobile App Automation** using **xFramium Toolkit & Perfecto**
- **Database Validation** using **SQLite**
- **Manual Testing** as Regression/Functional/Smoke/End-to-End /Integration Testing etc.
- Experienced with Mobile application testing
- Having Knowledge of API Testing :**Postman , RestAPI**
- Experienced with **Telematics**
- Experienced with **Agile** Methodologies

SKILLS

Selenium WebDriver

Core Java

TestNG

Page Object Model

Maven

Jenkins

AutoIT

xFramium

Perfecto

Zephyr

Git/Github

JIRA

Apache POI

SQL

SQLite

Web Automation Testing

- Experienced in web automation as:
 - Hybrid Framework with Page Object Model design pattern using TestNG
 - Data Driven approach for taking input test data
 - Integration of Maven, Jenkins & Git with Framework
 - Test scripts creation in IDE

Mobile App Automation Testing

- Experienced in mobile app automation with Android & iOS as:
 - Creation of Keyword-driven and Java automation test cases by using xFramium
 - Test execution using Perfecto integrated with Selenium automation framework

Manual Testing

- Experienced with Manual Testing as in:
 - Analysis of Business Requirements, Functional Specifications & Design Documents
 - Creation of Test Scenarios for application according to requirements & functional specifications
 - Preparing & executing detailed Test Cases with complete coverage, incorporated both positive and negative test conditions
 - Regression Testing, Functional Testing, Integration Testing, System Testing, End to End Testing, Smoke Testing, Compatibility Testing, User Acceptance Testing, Sanity Testing etc.
 - Logged defects in detailed, understandable, reproducible way by utilizing JIRA as defect tracking system
- Having proficiency with SDLC, STLC, Testing Methodologies and Verification and Validation

WORK EXPERIENCE

Presently working as Associate Consultant with **Allstate Solutions Pvt. Ltd.** Bangalore

EDUCATIONAL QUALIFICATIONS

Bachelor of Engineering (B.E) in Electronics & Communication from MLV Textile & Engineering College, Bhilwara (Rajasthan) in 2017 with 68%

Senior Secondary (10+2) from M.A Sr. Sec. School, Kota (Rajasthan) in 2013 with 67%

Secondary (10th) from M.A Sr. Sec. School, Bhilwara (Rajasthan) in 2011 with 84%

CURRENT POSITION AND RESPONSIBILITIES

Company : Allstate Solutions Pvt. Ltd. Bangalore
Role : Associate Consultant
Tenure : March 2018 to till date

PROJECT SUMMARY

Project Title : 1. ARITY

Environment : Selenium WebDriver, Eclipse, xFramium, Perfecto, Zephyr, Maven, Git, JIRA, SQLite

Arity turns mobility data into meaningful insights to make transportation smarter, safer, and more useful for everyone. Arity creates continuous connections to understand how people move, in real time. It is leveraging mobility data to provide customers and partners with behavioral insights, strategies, and solutions that create safer, more relevant transportation experiences for everyone.

Areas to test

- Web UI validation by designing & implementing automation test scripts using Selenium WebDriver
- Mobile app automation using xFramium & Perfecto
- Execution Regression, Functional, System, End-to-End Test Cases
- Testing data between UI & Database tables

Project Title : 2. ABT

Environment : Selenium WebDriver, Eclipse, xFramium, AccessDB, Maven, Git, JIRA,

Allstate Insurance Corporation protects people from life's uncertainties with more than 113 million proprietary policies. Allstate offers a broad array of protection products through multiple brands and diverse distribution channels, including auto, home, life and other insurance. Allstate Benefits is an industry-Leading provider of Employee benefits which provides right employee benefits like accident, critical illness, cancer etc that are customizable with various levels of coverage.

Areas to test

- Web UI validation by designing & implementing automation test scripts using Selenium WebDriver
- Execution Regression, Functional, System, End-to-End Test Cases
- Testing data between UI & Database tables

ROLES & RESPONSIBILITIES IN PROJECT

- Involvement in Scrum, Grooming session and Backlog refining & Planning
- Analysis of Business Requirements, Functional Specifications & Design Documents
- Creating Test Scenarios for application according to requirements & functional specifications
- Preparing detailed Test Cases using Zephyr for each test phase to ensure complete coverage, Test Cases are incorporated both positive and negative test conditions
- Designing, developing and executing test automation scripts using Selenium WebDriver for Web UI
- Creating test automation scripts using xFramium & executing them using Perfecto for Mobile App
- Converting previously generated manual test cases to automation suites
- Verify the automated test Result and Logged defects in detailed, understandable, reproducible way by utilizing JIRA
- Writing SQL queries to validate data between front-end reports and databases tables for back-end database testing
- Preparing status reports with details of executed, passed, and failed test cases and defect status
- Attending the regular client calls and discussing the weekly status with the project leadership team
- Defects identified in testing are communicated to the developers using JIRA
- Tracking and reporting the issues to project team and management during test cycles
- Participating in regular project status meetings and QA status meetings
- Maintaining all test artifacts and involving in all testing activities
