Projects

Skillup Online   https://skillup.online
Nov 2019 - Present   **Open edX, Django, AWS**
An education platform where students can take courses and instructors can create courses based on Open edX. I worked on the e-commerce part enabling the subscription-based model for the purchase, implementing various payment gateways, country based redirection, etc.

Kavishala   https://kavishala.in
Dec 2019-April 2020   **Django, ReactJS, NextJS, AWS**
A portal for poets around the world to show their creativity to the world by creating poetry. I developed this platform using Django as backend and ReactJS as frontend and deployed this application on AWS. It is having a lot of features such as text-to-speech, newsletter,etc.

Venture Garage
https://investor.venturegarage.in
Nov 2019 - March 2020   **Django, ReactJS, AWS**
A portal to connect investors and startups based on an algorithm to calculate the match % among them. In this portal, investors can show interest and communicate with the startup about investing.
I developed this portal using Django as backend & ReactJS as frontend and deployed it on AWS.

Firki | The Teacher Training Portal
https://firki.co
Dec 2018-   **Open edX, Django, AngularJS, AWS**
Worked as a full-stack developer in this project. Using Angularjs for front-end and Django as back-end. Also maintaining the AWS server it is hosted on. This project is based on Open EdX. A platform where students can take courses and check their progress and instructors can create interactive courses.

RSS Reader
http://rssreader-tiwari.herokuapp.com/
Nov 2017 – Dec 2017   **Django, AWS**
A simple website made using Django/Python Web scraping to fetch all the latest article from your favourite website.
