Objective:

Seeking an Agile Project Manager opportunity with a growing, dynamic company where I can further develop my skills and continue to advance my career.

Experience Summary:

- A result focused and agile enthusiastic IT Professional having 13 years of experience in both agile/scaled agile and traditional projects methodologies.

- **Certified Agile Coach (ICP-ACC), Certified Scrum Master (PSM-I) & Certified Product Owner (PSPO-I)** having about 5 years of experience in working in agile projects with over three years of experience as a Scrum Master.

- Involved in all phases of the SDLC (Software Development Life Cycle) from analysis, design, development, testing, implementation and maintenance with timely delivery against aggressive deadlines.

- Facilitated Scrum Ceremonies such as Sprint Planning, Sprint Review, Retrospectives and Daily Stand-up.

- Worked closely with Product Owner in backlog management and continuous delivery of features.

- Coached Product Owners in creation and maintenance of Product Backlog.

- Assisted team to remove impediments by having an understanding the control and release processes and manage the inter team dependencies

- Helped team to solve problems rather than provide solutions.

- Coached team members on Agile principles and providing general guidance on the methodology.

- Continuously learned Agile/Scrum techniques and shared findings with the team.

- Engaged with other Scrum Masters to increase the effectiveness of the application of Scrum in the organization and manage the inter team dependencies within the Scaled teams.

- Solid technical experience of nearly 10 years in full software life cycle using Database tools for Banking, industries including Oracle design, development, testing and implementation of various software projects, applications and database management systems in a variety of environments.

- Highly experienced in Planning, Analysis, Design, Development, Testing, and Deployment in a demanding and challenging environment.

- Expert in Oracle backend developer Includes PL/SQL, SQL and UNIX Scripting.

- Experienced in creating Stored Procedures, Packages, Triggers, Functions, Views, Synonyms, Indexes, Exception Handling, Materialized Views, Partitioning, External Table & Complex queries.

- Well-acquainted in working with Complex queries with joins, date functions, inline functions, sub-queries, analytical functions, WITH clause to generate adhoc reports, functions and procedures

- Hands on experience using Oracle utilities like SQL*Loader, SQL Developer and TOAD.

- Experienced in UNIX Shell Scripts and expertise in developing scripts to reduce manual effort.

Employment History:

Virtusa Consulting Services (June 2015-Present)   **Designation:** Lead Consultant

Project Details:

1.

Project	**IT Risk Dashboard [Citi]**
Project Description	ITRDR is a front-end application which provided business view to the users on various key metrics depending upon the different focus areas.
Roles & Responsibilities	As an Agile Project Manager and Scrum Master I am responsible for: • Managing agile development project consisting of two scrum teams with diverse technologies such as DB, ETL, Cognos, Java, Angular etc. • Interacting with the business and product owners on understand the business needs and help the product owners in refinement activity. • Weekly status reporting to the Senior management on the project progress. • Facilitated Sprint Planning, Daily Scrum, Sprint Review & Sprint Retrospective. • Assisted Product Owner in product backlog management and prioritizing the features • Educated and coached the team about the Scrum framework. • Adhering to and make the team to follow the Scrum values, principle and practices in day to day project work. • Mentoring the team-mates and helping them in resolving any technical challenges
Duration	April 2020 to Till Date
Domain	BFS
Technology	[Oracle 12c, SQL, PL SQL, Unix, Shell Scripting]

2

Project	**Single Customer View-SCV [Fidelity International]**
Project Description	With having three record keeping systems, SCV acts as a golden data source for its downstream. To provide necessary business data to downstream for BI reports, we have implemented Oracle GG replication for all the required tables from our data sources. SCV performs various transformation logic on our replicated schema tables to provide data to our further capabilities which gets it displayed on web to our end customers.
Roles & Responsibilities	As a Scrum Master I am responsible for: • Facilitated Sprint Planning, Daily Scrum, Sprint Review & Sprint Retrospective. • Assisted Product Owner in product backlog management and prioritizing the features • Educated and coached the team about the Scrum framework. • Adhering to and make the team to follow the Scrum values, principle and practices in day to day project work. • Mentoring the team-mates and helping them in resolving any technical challenges
Duration	March 2017 to March 2020
Domain	BFS
Technology	[Informatica, Oracle 12c, SQL, PL SQL, Unix, Shell Scripting, Python

2.

Project	**PS/CPS/ES [Fidelity International]**
Project Description	PS/CPS/ES are three applications which consume position/cash/escrow data from other intermediate systems and augments the position and cash data received after processing the files and prepare the latest position/cash view and send it to other systems for further consumption.
Roles & Responsibilities	As a PL-SQL Lead Developer I am responsible for: • Understanding the business requirement and preparing the design strategies. • Develop and Enhance the application as per the business requirement. • Managing defects raised by the client, formulating test cases and tracking defects and change requests. • Development and testing support. • Documentation –Unit Test Plan & Release Notes. • Mentoring the team-mates and helping them in resolving any technical challenges
Duration	September 2016 to February 2017
Domain	BFS
Technology	[Informatica, Oracle 11g/12c, SQL, PL SQL, Unix, Shell Scripting, Python

3.

Project	**Central Remediation-eFlex [RBS, Scotland, UK]**
Project Description	**Central Remediation** is an application which is used by the RBS Bank for remediation of the access amount which has been debited from or credited to customer account. This application also generates various reports for the analysis, uploads various files containing remediation related data, and extracts data in files to be sent to users for further analysis. The application is built on Microsoft ASP.NET language and use Oracle as a database.
Roles & Responsibilities	As a PL-SQL Lead Developer I am responsible for: • Managing and supporting the application. • Run time client support to their issues & queries with utmost priority. • Analysis, designing as well as development of requirements given by the client. • Managing defects raised by the client, formulating test cases and tracking defects and change requests. • Development and testing support. • Documentation – Design document & Unit Test Plan & Release Notes.
Duration	June 2015 to August 2016
Domain	BFS
Technology	Oracle 11g/12c, SQL, PL SQL, Unix, Shell Scripting

Tata Consultancy Services [April 2007-May 2015]   **Designation:** Assistant Consultant

Project Details:

4.

Project	**ML – [Allianz Global Investors, San Francisco, California, USA]**
Project Description	**Middle Layer** is one of the main mission critical modules that download live trade data from the Bloomberg Interface being used by AGI. The application is extremely critical and should be up and running 24 * 7. Trade comes from various regions which include San Francisco, Honk Kong, Asia Pacific, London, Frankfurt etc. This downloaded data gets stored in Middle Layer database and is later used by other AGI applications to carry out various processing. The application is built on C language over UNIX environment and use Oracle as a database.
Roles & Responsibilities	**Responsibilities:** As a Technical Lead I am responsible for: • Managing and supporting the mission critical application. • Run time client support to their issues & queries with utmost priority. • Analysis, designing as well as development of requirements given by the client. • Managing defects raised by the client, formulating test cases and tracking defects and change requests. • Development and testing support. • Documentation – Design document & Unit Test Plan & Release Notes.
Duration	October 20111 to May 2015
Domain	BFS
Technology	Oracle 10g, Unix, Shell Scripting, PL-SQL, C

5.

Project	**Integrated Material Management Online System [Indian Air Force, New Delhi, India]**
Project Description	[**Transportation** Module is one of the most important & critical modules among the various phases of the IMMOLS. It deals with the smooth & proper flow of material among the units. It is enriched with many facilities for user to track and maintain the proper check on material at all transit level. **Tools**, as the name suggests, is equipped with many user-friendly applications which is used by the entire module to assist in their day to day work.
Roles & Responsibilities	As a Module Lead, I was responsible for: • Requirement gathering & analysis for the development/enhancement request and creating analysis document as per the analysis. • Developing/Enhancing the components for Transportation & Tools modules. • Rigorous Unit-Testing of the impacted or newly developed components and fixing the defects raised by the system testing team. • Managing defects raised by the client, formulating test cases and tracking defects and change requests • Run time client support for over 150 different locations to their issues & queries with utmost priority.
Duration	August 2010 to September 2011
Domain	ERP
Technology	Transact SQL, C++, Crystal Report

6.

Project	**DBL [Resort Condominiums International, Indianapolis, USA]**
Project Description	DBL module is the back-end module of the RCI which facilitates the development of various components to devise business logic for the application using technologies like DBL, Unix Shell Scripting & PL-SQL modules.
Roles & Responsibilities	As a Developer, I was responsible for: • Analysis involved study of various business processes, transactions, rules and the requirements of the clients. Identification of system specifications suggesting solutions. • Designing and developing codes components in many phases of the project for different modules and creation of HLD and LLD documents. • Responsible for ensuring that the system is delivered as per requirements stated. Execution of test cases as per drawn test plan. • Interacting with the clients over the call and through the mail directly to update the development status and to go through the design documents.
Duration	October 2009 to July 2010
Domain	TTH
Technology	Oracle10g, PL-SQL, Unix, Shell Scripting, DBL

7.

Project	**NDS-Auction [Clearing Corporation of India Ltd., Mumbai, India]**
Project Description	NDS–Auction is a screen based electronic trading system facilitating the Primary Market operations, of various types of Government of India Securities and Treasury Bills, in the money market on behalf of Reserve Bank of India. The system facilitates issuance of Government of India Securities (Fixed income, Floating rate, Zero Coupon, Capital Index and Put-Call bonds) and Treasury Bills.
Roles & Responsibilities	As a Developer, I was responsible for: • Analysis involved study of various business processes, transactions, rules and the requirements of the clients. Identification of system specifications suggesting solutions. • Designing and developing codes components in many phases of the project for different modules and creation of HLD and LLD documents. • Responsible for ensuring that the system is delivered as per requirements stated. Execution of test cases as per drawn test plan.
Duration	April 2007 to September 2009
Domain	BFS
Technology	Oracle10g, PL-SQL, Unix, Shell Scripting, C++, Pro*C

Educational Details:

- B.E in Electronics & Instrumentation Engineering (2006) from Biju Patnaik University of Technology, Orissa with 73% marks.

- Intermediate (12th) with Science (2000) from Bihar Intermediate Education Council, Patna with 67% marks.

- Matriculation (10th) in 1998 from Bihar School Examination Board, Patna with 75% marks.

Awards & Certificates:

- **PRINCE2 Agile Practitioner**
- **PRINCE2 Practitioner**
- **Certified Senior Agile Project Manager (IAPM)**
- **ICAgile Certified Professional (ICP-ACC)**
- **Professional Product Owner (PSPO-I)**
- **Professional Scrum Master (PSM-I)**
- **NCFM Mutual Funds: A Beginner's Module Certification**
- **Oracle Cloud Infrastructure Foundations 2020 Certified Associate**
- Thought Leader Award at Virtusa
- On the spot award for outstanding performance while in TCS
