---

### EXPERIENCE SUMMARY:

- 4.4 years of experience in Information Technology with expertise in ESB technology in **Dell Boomi, Boomi Atmosphere, and SQL Server.**
- Hands-on experience of development, deployment and management of multiple integration processes created on Dell Boomi, enabling integration landscapes for the proposed architecture for integration processes.
- Worked on multiple projects software development life cycle.
- Good at implementing complex **Groovy Scripts** in Boomi
- Worked on **Atomsphere API** to retrieve Environment extensions and send them over email
- Involved in implementing the change requests in Test and production environments.
- Good understanding of Cloud Computing – SaaS, PaaS, IaaS, and iPaaS
- Exposure in different data formats, such as JSON, XML, and CSV.
- Proficient in analysing Use Case, Business Requirement and Functional Documents.
- Worked on **Atom Queues**
- Installed Local Atoms, Gateway & Authentication Brokers.
- Worked on wide range of support cases, gathering information to suggest fixes and workaround to the customers

### Certifications:

- **Associate Integration Developer Certification**
- **Professional Integration Developer Certification**
- **API Management Certified**
- **API Design**
- **EDI X12 Associate Certification**

### Work Experience:

- **NOWSA GLOBAL PRIVATE LIMITED, Hyderabad (from April 22nd 2019 – July30th 2021)**
- **Worked as Boomi developer for IBM (from Aug16th 2021– Sep 12<sup>th</sup> 2023)**

### Academic Profile:

- **B.Tech in Electrical and Electronics Engineering, RVR & JC College of Engineering.**

### Technical skills:

ETL : SQL Server 2008  
Integration Tool : DELL Boomi, Boomi Atmosphere  
Testing : Manual Tester, Automation Tester

## **PROJECT EXPERIENCE & SUMMARY:**

### **PROJECT # 1**

**CLIENT:** LAM Research  
**DESIGNATION:** **BOOMI Integration Consultant**

LAM Research Corporation is an American corporation that engages in the design, manufacture, marketing and service of semiconductor processing equipment used in the fabrication of integrated circuits.

### **ROLES AND RESPONSIBILITIES:**

- Actively attending all the business calls from Envisioning phase and planning phase to understand the business requirements and the business logics.
- Created a web service server, soap client connections, SAP connection and sales force connection to establish the connections between Change Point – Boomi – SFDC
- Created maps to transform the source data format to target data format.
- Created functions using java and Groovy scripts to meet the business requirements
- Implemented the exception handling mechanisms using Try/catch block and also implemented the email notification mechanism as part of exception handling.
- Performed unit testing and supported for Data integration and system integration testing.
- Provided the extreme support to the testing teams to make sure testing is going smooth without any issues from Boomi perspective
- Deploy the Boomi code in to production environment and supporting extensively for post implementation testing.
- Providing the extensive support for the business for one week guarantee period.
- Involved in Functional Testing, Unit testing and Regression testing.
- Update the Data Migration Tracker and Maintain Project Documentations for Plant wise.

### **PROJECT # 2**

**CLIENT:** **The Timken Company, USA**  
**DESIGNATION:** **BOOMI Integration Developer**

The Timken Company is a global manufacturer of bearings, and related components and assemblies based out of USA. The Timken Company brands includes Timken, Fafnir, Philadelphia Gear and Drives.

## **ROLES AND RESPONSIBILITIES:**

- Worked on Dell Boomi to design and develop inbound and outbound integrations of Success Factors employee central.
- Understanding and extensively worked on commonly used SFAPI provided by Success Factors for extracting data.
- Have developed integrations of Employee Central and Recruitment.
- Creating/Editing Employee data in Success Factors using UI/bulk upload.
- Enhancing existing data interfaces and making them reusable.
- SOAP web services in Boomi.
- Scheduling and Deploying processes.
- Have worked on Dell BOOMI, third party integration tool to handle data transfer from Success factors into SAP or to SFTP or updating the APIs in Success factors

## **PROJECT # 3**

**CLIENT: VICIS**

**DESIGNATION: BOOMI Integration Developer**

VICIS, Inc. designs and manufactures football helmets that mitigate linear and rotational impact forces.

## **ROLES AND RESPONSIBILITIES:**

- Actively attending all the business calls from Envisioning phase and planning phase to understand the business requirements and the business logics.
- Created a web service server, soap client connections, SAP connection and sales force connection to establish the connections between Change Point – Boomi – SFDC
- Created maps to transform the source data format to target data format.
- Created functions using java and Groovy scripts to meet the business requirements
- Implemented the exception handling mechanisms using Try/catch block and also implemented the email notification mechanism as part of exception handling.
- Performed unit testing and supported for Data integration and system integration testing.
- Provided the extreme support to the testing teams to make sure testing is going smooth without any issues from Boomi perspective
- Deploy the Boomi code in to production environment and supporting extensively for post implementation testing.
- Providing the extensive support for the business for one week guarantee period.
- Involved in Functional Testing, Unit testing and Regression testing.
- Update the Data Migration Tracker and Maintain Project Documentations for Plant wise.
