## EXPERIENCE

### Practo, Bangalore — *Software Engineer 1*

Oct 2020 - PRESENT

- Helped in decreasing Tat by integrating with the third party delivery partners , which helped in lowering the tat by almost 12 hours, which leads to an overall csat score and helped the ops team to automate the process of booking at that delivery partner side.
- Implemented the backend api's to enable customers to track their orders whenever the order status change which leads to smooth customer experience.
- Implemented the system to show tat on the consult page only when the medicine can be delivered on the same day.

### Infosys, Bangalore — *System Engineer*

Oct 2019 - Oct 2020

- Implemented the DB migrations across various projects to migrate the database from cassandra DB to postgres DB.
- Worked a shopping website and travel booking website using node and express in backend, mongodb as database and react and redux in frontend.
- Developed 20+ batch programs using python to run batch jobs daily.
- Worked on the entire Product Development Lifecycle from understanding the Business Case to Implementation
