Experience

SCRUM MASTER, Infosys Pvt. Ltd., Pune, India. | March 2018 – Present

Project: **XPO Logistic** |Agile | Leadership| SAFe | ATDD, BDD, CI | KANBAN| XP |Pair Programming | Confluence

- Serving as Scrum Master for one of the biggest accounts in Infosys, with Logistics domain from past 2 years for the module like Route Management and Order Management. Being Scrum Master, I analyse the scope of projects, work cross-functionally with IT and other stakeholders, develop project plans with users, and provide time estimates. Handled both the team efficiently and removed all the impedance for teams smoothly.
- **Roles & Responsibilities**:
- Keep backlog up to date by working with Product Owners and Project Manager.
- Communicates with Management and outside stakeholders. Helps protect the team from uncontrolled injection of work.
- Ensure that the Scrum Teams are working effectively towards efficiencies and productivity to execute on business objectives being delivered with high quality standards.
- Perform as ScrumMaster for 2 scrum teams with a focus on guiding the teams toward improving the way they work and facilitating sprint planning, retrospective and demos.
- Provide risk management and issue / problem resolution proactively.
- Assisting with internal and external communication, improving transparency, and providing information
- Improve processes to optimize performance and value over time.

Senior Engineer, Infosys Pvt. Ltd., Pune, India. | Sept 2018-March 2018

Project: **XPO Logistic** | Dot Net Core| Angular 6 | Elastic | Kibana| Rabbit MQ | Couch Base

- Dot net Full Stack Developer, responsible for developing optimistic routes for delivery of bunch of parcels.
- Designed the modular Architecture of the application.
- Creating APIs for the new features of the product.
- Coordinating with different teams and managers and providing solutions and necessary support to the ongoing modules
- Coordinating with stakeholder for approvals
- Used Google Location API to optimize routes along with some external services like **appean** to make routes more optimal.
- Converted orders to trips and routes and processed them efficiently from our driver delivery mobile application.

- **Roles & Responsibilities**: Requirement Understanding, Design, Development, Unit Testing, Defect Fixing.
