PROJECTS

EYESTALK – VISUAL AIDED SPEECH AND MESSAGING

Made as part of final year college project. This web application is made for people suffering from locked–in syndrome. The users will be able to type and send messages with just their eye movements. Every action on the web app is through eye inputs.

This was a 6 month project where we initially formed the idea and ways of implementing it. The project was divided into modules and solved one at a time. Finally the project was tested and after many iterations finally complete.

- Link for live demo – https://eyestalk.ml/
- Users who are paralysed and mute can use it to "speak".
- Made using Javascript, HTML, CSS, APIs and Firebase Realtime Database.

EVORAGE – SHOOTING GAME

A multiplayer shooting game made with Unity. It allows multiple users to join and fight in an area. The last one standing wins the round.
