## PROJECTS

---

### TCS-

**Domain-** Telecommunication and Media

**Project Name** – Hosted OSS/BSS (HOBS)

TCS' HOBS is a platform for new age digital services as well as traditional telco services. The cloud-ready platform is secure and scalable. It covers key business processes across multi-channel engagement, product management, selling, assurance, revenue management, partner management, and enterprise management.

**Dealer Management System** manage the receiving, processing and acknowledgement of device orders and maintaining the life cycle of devices.

**Number Management System** is a centralized repository and management of number life cycle and states. NMS supports creation of number ranges, assignment, tracking, reports, ports (in/out) and vanity numbering.

Worked as a developer on RESTful API development using Java, spring boot and micro services in the platform team of **HOBS Dealer Management System**. (APAC Clients- Sony Pictures India, Eastern Telecommunications Philippines [Inc.](#), Jurassic Fibre, Celcom Malaysia).

### IBM-

#### Product

Engineering Lifecycle Management(ELM)

Engineering Test Management(ETM) Application– With IBM ETM tool, one can collaboratively plan software testing, construct tests, and manage test artifacts throughout the software development cycle.

Working with US, UK and German based clients. Working on RESTful API development using Java, spring boot, micro services, multithreading and collection to build/develop ETM software application.
