DILEEP BODANKI

San Francisco, CA 94112 | (865) 360-3431 | dileepbodanki@gmail.com

Professional Summary

Accomplishments include designing and deploying applications in a fast-paced development environment with tight deadlines and demanding objectives. Skilled at overseeing junior team members, collaborating with project leaders and consulting with quality assurance and other developers to produce fully functional and successful applications.

Skills

Languages
JAVA, C, Python.

Frame Works
Springboot, Struts, Hibernate.

J2EE Technologies
Web Services (REST, SOAP), JSP, JDBC, JMS.

Devops Tools
Jenkins (CI/CD pipeline), Chef

Web/Application Servers
Apache Tomcat.

Databases
MySQL, Oracle, DB2, Mongo.

Version Controls
GIT, SVN.

Monitoring Tools
Splunk, New Relic, Nagios.

Work History

Sr. Java Developer — Jun 2017 - Current
Gap Technologies Inc. — San Francisco, CA

- As a senior java developer, I work in developing backend services for a POS (Point Of Sale) system.
- Involved in designing system architecture, development, integration and testing various spring boot micro services.
- Lead a team of onsite and offshore engineers that delivered various business enhancement features.
- Have extensive knowledge on the working of a retail POS system.
- Involved in developing a caching mechanism to support business needs for network offline scenarios.

Research Assistant — Feb 2012 - Dec 2016
University Of Georgia — Athens, GA

- As a research assistant I worked with the Enterprise Information Technology division of UGA in the development of UGA mobile application and UGA student portal.
- I worked to integrate several third-party applications like CAS (Centralized Authentication System), Skillsoft into the UGA portal as well as maintaining and stabilizing the applications by migrating them to java spring boot framework which made the deployment process more efficient.
- Worked on designing backend services for an application that provides the University Bus Schedules and live status of the busses.

Systems Engineer — Jul 2010 - Dec 2011
Infosys Technologies — Hyderabad, India

- Worked on a project for Walmart which deals with applications development and testing that are used for Human Resource Management.
- This project involved in developing backend services using java struts framework.
- Our team worked on the development of the manager approval system and employee leave management system.
- I worked on the developing the authorization module and hierarchy configuration.
