- X- CGPA 8.4.
- XII- 73.5%.
- Participated in Science and Maths olympiads.
- Played kho-kho at Regional level from 2011 to 2014.
- Participated in various Dance competitions.

SKILLS

Tools:	*Selenium,Jenkins,AWS,Ansible,Docker,Kubernetes,Terraform,Jira,Bugzilla,linux,Postman, Git, Visual studio,Robot-Framework.*	**Skills: Intermediate**
Programming:	*Python,Java,Javascript,Node Js.*	**Proficiency : Intermediate**
Communication:	*English,Hindi,German*	**Proficiency : Intermediate**

EXPERIENCE

Wipro Limited | Software Engineer in Test   Pune,MH | **12/2021-Present**
- Constructed test cases,test scenarios and performed functional testing.
- Implemented Automation test scripts primarily used BDD cucumber framework with testNG,JAVA and Selenium.
- Generated HTML reports and utilized apache poi library for reading data from word documents.

Aloha Technology | Quality Assurance Engineer   Pune,MH | **08/2019-12/2021**
- Demonstrated understanding of Software Development Life Cycle and Test Methodologies.
- Designed unit and integration test cases.
- Proficient in Agile methodology.

PROJECTS

1. **Rent-Car-Management**
- **Description :** Open source Project.
- **Tools :** AWS,Jenkins,Git,linux,Docker.
- **Role and Responsibilities :**
    - Created Jenkins CI/CD pipeline using AWS-EC2.
    - Containerized applications using Docker to ensure consistency across environments.
    - Integrated Jenkins with Github using webhooks for Continuous Integration.

2. **Wells-Polarian**   **09/2022- Present**
- **Description :** Unified application lifecycle management solution for complex software systems in the energy sector.
- **Testing Type and Technology :** Automation Testing,Java,BDD Cucumber.
- **Role and Responsibilities :**
    - Implemented automated scripts that identified and eliminated 90% of test cases with high failure rates, reducing debugging time by 25% and increasing overall product quality.
    - Developed and executed automated scripts using BDD cucumber framework with TestNG, JAVA and Selenium to ensure 80% test coverage and 30% faster testing cycles.

3. **2c2p-PGW (Payment-Gateway)**   **09/2020-09/2021**
- **Description :** Payments platform provider operating in emerging markets.
- **Testing Type :** Manual testing**.**
- **Role and Responsibilities :**
    - Involved in Payouts Project wherein created Manual File payouts and API payouts for Testing of various payouts from different countries.
    - Conducted continuous Regression Testing on Latest build releases.

4. **Subway Payments**   **01/2020-09/2020**
- **Description :** Provider of payments solutions in developing markets.
- **Testing Type :** Manual testing**,** Automation testing**.**
- **Development Type :** Backend development using Nodejs,
- **Role and Responsibilities :**
    - Developed and deployed APIs on AWS and tested them.
    - Engaged in API testing using Postman.
    - Wrote unit and integration test cases.

5. **QRPGW (Quick response Payment-gateway)**   **08/2019-01/2020**
- **Description :** Payment gateway based in Thailand, with multiple portals including Admin, Company, and Partner portals.
- **Testing Type and Technology :** Manual testing, Automation testing ,Python, Robot-framework.
- **Role and Responsibilities :**
    - Conducted UI automation.
    - Reported bugs during application automation.
    - Generated log reports and HTML reports.
