Tableau-Data Viisualization Udemy Online Certification

## PROJECTS

### Cricket Match Winning Prediction

▫ The project specifically focuses on ICC CWC 2019 to predict the winner between the two teams who will be playing on that day.Toss,toss decision,venue are the important factors taken into consideration for predicting the winner of the match.Project is divided into two parts i.e, web scrapper and ML model.Scrapper downloads the data from particular web site and stores it in CSV file.The data cleaning part is done in scrapper only.On this file the model is trained so that it can predict the winner.

### Secured Data Access In Cloud Computing

▫ This project is oriented on small scale industry mainly having two modules i.e, user and admin module.The project is that the authorities would be able to upload file on server and the employees would be able to download it using a special key.Data uploaded is in encrypted format and it is decrypted when the key is verified.
