Ramssoft India ramssoft.com

Dec 2023 to Present

Senior Software Engineer Remote

Building the all-in-one SaaS solution - fast, innovative, customizable - with AI-powered imaging and instant access to medical images for patients and doctors.

Seanergy Digital

Aug 2019 to Nov 2023

Principal Software Engineer Hyderabad, Telangana

Project- Glooko | Diabetes Remote Monitoring

Key Responsibilities:

Creation of React.JS based Frontend, coupled with state management using Redux.

Design and development of reusable UI components using Storybook for isolated testing.

Improved enrollment page initial load time lesser than 1.5 second for a better first-time customer experience.

Maintaining 90% code coverage with unit tests using Jest and Enzyme .

Identify and address performance bottlenecks, optimize code, and enhance loading times to provide a smooth and efficient user experience.

Conduct thorough code reviews for team members, providing constructive feedback to ensure code quality, adherence to coding standards, and knowledge sharing.

Create and maintain technical documentation, including architectural diagrams, code documentation, and usage guidelines for fellow developers.

Stay updated with emerging front-end technologies, tools, and trends, and apply them when relevant to improve development processes and user experiences.

Develop APIs using both Node.js and Ruby on Rails, following the MVC (Model-View-Controller) pattern and a three-tier component architecture.

Provide technical guidance, mentorship, and leadership to junior developers in the team.

Lead the design and architecture of complex front-end solutions that align with the overall project requirements and best practices.

Adherence to the Scaled Agile Framework methodology.

NTT DATA SERVICES

Feb 2016 to Feb 2019

Software Development Analyst Noida, Uttar Pradesh

Project Name - Tenet Health Care (Tenet Health Multi-Facilities Web Applications)

Key Responsibilities:

Created and sustained web applications using CMS platforms like Microsoft SharePoint and Progress Sitefinity.
Developed well-tested, coherent, and well-documented JavaScript, HTML, and CSS code.
Collaborated closely with back-end developers to construct RESTful APIs.
Translated business requirements from Business Analysts into new application functionalities.
Utilized JavaScript and JQuery to retrieve and manipulate dashboard data, enhancing user capabilities and maintaining site performance and responsiveness.
Automated the loading of multiple website pages and screenshot capturing using Selenium.
Developed a Proof of Concept (POC) chatbot with team using React.js and Node.js, enabling interactive engagement between clients and customers on the web application.
Fostered effective communication between Onshore and Offshore teams.
Adhered to Agile/Scrum methodologies for project management.
