## PROJECTS

### Keeper App
🔗 https://tranquil-lake-77222.herokuapp.com
A to-do list app.
- This app is developed using JSX, React.js, Material UI. It is a clone of Google Keep (a to-do list app).
- This app is developed using functional components, here class components is not used. I have used the latest React hooks (useState) to change the state without using class.

### My Diary
🔗 https://nameless-escarpment-89500.herokuapp.com
A online diary
- This app is created by using Nodejs, Expressjs, ejs. MongoDB is used with Mongoose for database.
- This app is like a online diary, we can write some content and store it too, the good thing is that we can access it from anywhere.
