## EMPLOYMENT HISTORY

**Vyom Labs Pvt. Ltd, Pune, India** (2.6 Years)

**Salesforce Developer & Administrator** (March 2018 - Present)

## PROJECTS

<b>Component Name: Custom Activity Chart</b>	<b>Team Size: 1</b>
<b>Description:</b> The Client is leading CRM & Cloud solution provider with clients across USA & India. They are building product which includes this component on record pages. Basically, Chart Lightning component is used to show graphs for activities. It also used to show the recently modified details along with their type i.e. (call, Email, Meeting, Other). One of the important features of this component is that it shows all tasks grouped by their types; the users wouldn't be required to check type of each activity manually.	
<b>Responsibilities:</b> <ul style="list-style-type: none"><li>➤ Understanding the architecture and client requirements and translates the same into design, implement the same using Salesforce cloud and conduct testing of the entire component.</li></ul>	<b>Technology:</b> - Aura Component Framework <b>Tools:</b> VS Code.

<b>Project Name: Invoice Processing Custom Application</b>	<b>Team Size: 4</b>
<b>Project Description:</b> The client is one of the top companies of goods supplier across the globe. They wanted to build an application to process invoice records of grains transport. The invoices were being raised by the vendors as PDF through an email. The tool used to capture such invoices coming from email and then getting processed through several teams and their approvals. The processing of invoice was also involved daily upload of purchase orders from an excel file directly in the visualforce pages to match the invoices with respective purchase orders.	
<b>Responsibilities:</b> <ul style="list-style-type: none"><li>➤ Development of Visualforce Pages including Pagination, Branding Headers, Footers.</li><li>➤ Writing of Apex Classes for managing huge number of records.</li><li>➤ Writing of Email Service for creation of invoices through email.</li><li>➤ Created Workflow rules for sending email notifications.</li><li>➤ Managing of different views in visualforce for the teams on basis of Queue.</li></ul>	<b>Technology:</b> - Salesforce (VF, Apex) <b>Tools:</b> Aside.io, Dataloader.io

<b>Project Name: Survey Implementation</b>	<b>Team Size: 3</b>
<b>Project Description:</b> The client is one of the top companies of goods supplier across the globe. They wanted to build a portal for submitting the surveys for the cases which are resolved in the organization. This will include the survey expiration functionality as well as survey will not get submitted twice. The survey will be triggered once the staff assigned to the case marked the case as resolved. After the resolution the client will get notified through email and after clicking on the link from the email it will be redirected to the survey portal. It will also include the language translation.	

**Responsibilities:**

- Development of Visualforce Pages including Pagination, Branding Headers, Footers.
- Created workflows for sending email notifications.
- User access management by using security model.
- Managing the language translation using custom labels.
- Created reports and dashboards for survey submitted and total survey triggered.

**Technology:** -
