Projects

- **EnLume Website** [live demo](#)

  - Led the creation of the website https://www.enlume.com/ , a vital online presence for our business, EnLume Technologies to present our goods and services, provide industry insights, and communicate with clients and partners.

  - As the main front-end and back-end developer, I was essential in making sure that the website complemented the branding and objectives of our business.

  - Integrated Payload CMS to manage and organize content efficiently, allowing for seamless updates and maintenance.

  - Collaborated closely with the design team to translate visual concepts into functional web elements, ensuring a cohesive and visually appealing website.

  Technology – ReactJS, Payload CMS, MongoDB, AWS SES

  Role & Responsibility - Led the execution of ReactJS including front-end development and Integrated Payload CMS to manage and organize content efficiently.

- **Form214**
  - This application is associated with the **Merits** organization. Using forms to manage the employees, users, and supervisors. Super admin manages/handles the roles and responsibilities to others like staff.
  - This is where the student submits a claim for the payment of any school provided services, such as camps, field excursions, language classes etc. He asked for a claim amount for that.
  Working closely with clients and cross-functional departments to communicate project statuses and proposals

  Technology – ReactJS, Typescript, NodeJS, Postgres, Jot Form
  Role & Responsibility - Execute the ReactJS-related steps.

- **ACE-OHIO**
  - This application is relevant to organizations with Merits. This has to do with how the institution manages the student accounts.
  - This is where the student submits a claim for the payment of any school-provided services, such as camps, field excursions, language classes etc. He asked for a claim amount for that.
  Technology – ReactJS, Typescript, NodeJS, Postgres.
  Role & Responsibility - Execute the ReactJS-related steps.

- **BramhaCorp [live demo](#)**
  -This website is related to real estate development, hospitality, and retail development.
  - As the main front-end and back-end developer, I was essential in making sure that the website complemented the branding and objectives.
  Technology – ReactJS, Javascript, GatsbyJS, Prisms Headless CMS
  Role & Responsibility - Frontend Developer, Backend Developer, Requirement Analysis, Unit Testing.
