

Seeking a position as a RPA Developer (UiPath Tools)/ Senior RPA Developer .

## Professional Summary

- **8 + years** of total IT experience in software analysis, design, development, testing and implementation of client/server and web-based applications.
- **2 years of RPA (Ui Path) experience** in analysis, design, implementation, and **6 Years** of Industry experience in the global Telecommunication and IT services industry.
- Implemented on **UiPath Forms** creating dashboard and gathering input data from users.
- Knowledge and experience in integrating different applications using **web services/ Rest API**.
- Implemented end to end process in **Automation Hub**.
- Knowledge and experience in integrating **AL/ML** and **NLP Cognitive Services** using UiPath.
- Have knowledge of the debugging process, identify errors in the log file and, close defects.
- Implemented **Basic, Desktop, web recording** using numerous activities and Flowcharts using UiPath.
- Implemented on Screen Scraping methods i.e. Optical character Recognition (**Google OCR / Microsoft OCR engines**) to process **PDF** and **JPEG** images.
- Designed multiple workflows using **RE Framework** in **UiPath** and Worked on **UiPath Orchestrator** in the deployment of an Automation process.
- Strong ability in writing **SQL** Complex queries and experience working with databases like **Oracle**, and **SQL Server**.
- Worked as a POC for RPA developers and acted as a bridge between development and testing team.
- Observed closely with the solution architect how to prepare **Process Definition Document (PDD)** and **Solution Design Document (SDD)**. While creating PDD document used on **UiPath Task Capture** tools to design the workflow and process screenshot
- Worked with mainframe, windows, web application, SAP automation.
- Experience in working with the **JIRA** issue tracking system and Bitbucket.
- Experience in **Agile, Waterfall Methodologies** with a clear understanding of Iterative and Evolutionary principles.
- Experience with version control tools like **GIT**.
- Good understanding in development of the Use Case Document with Business Analyst for the Automation process.
- Involved in End-to-End development of Business Process using Robotic Process Automation
- Unit testing, Strong problem analysis and resolution skills. Highly motivated team player with zeal to learn new technologies and always believes in giving the best of efforts.
- Experienced in using **UiPath, Orchestrator, Screen and Data scraping methodologies**.
- Expertise in **RE Framework, Exception handling and Logging** mechanisms.
- Automated **Web and Desktop** based applications using automation tools.
- Worked on **UI elements, Data scraping, Selectors, PDF, Image and Text Automation** using UiPath tool.
- Extensive experience on **UI Path** studio concepts like debugging a workflow, managing the packages, creating reusable library packages.

- Expertise on various commands and components such as **String Operation, Excel and CSV commands, Exception Handling, Send Email, Delay and Wait commands, UI Explorer and Advanced UI Interactions, Flowcharts, Sequences and State machines.**

## Technical Skills

<b>RPA Tools</b>	UiPath, Automation Hub, Task Capture, AA V11, MuleSoft RPA
<b>Programming Languages</b>	VB.Net, C#
<b>Web Technologies</b>	HTML, XML, CSS
<b>Cloud Technologies</b>	Microsoft Azure Platform
<b>Scripting Languages</b>	JavaScript, VBScript, Python
<b>RDBMS</b>	MS SQL Server 2014/2012, Oracle 12c/11g, MYSQL
<b>Operating Systems</b>	Windows 10, 11
<b>Version Control</b>	GIT HUB
<b>Additional Tools</b>	AEM, SalesForce, ABBYY Flexicapture, ABBYY Finereader, IBM BPM & BAW

## Education Details

-  Bachelor of Science (Hons) - Software Engineering.

## RPA Diploma of Completion

- UiARD Certified Advanced RPA Developer.
- VMware Certified Professional.

## Professional Experience

**Senior RPA Developer**  
KDDI America Inc.

**Mar 2021-Present**

### Responsibilities:

- Hands-on experience in managing robot's workloads using UiPath Queues.
- Use agile/rapid-iteration methodologies to deliver work and involve in AGILE AND SCRUM meetings.
- Used Data Scraping method for extracting structured data from browser applications or documents into a CSV file or Excel Spread sheet.
- Used Cron Expression in Orchestrator for triggering complex schedules.
- Computed on Web Applications, Desktop Applications, and Windows Applications by using basic, desktop, web recorders, and screen scraping & data scraping.
- Used Excel automation for repetitive Excel data entry, appending and for comparing columns.
- Interacted with different mail services such as SMTP, OUTLOOK to get the mail messages into folder.
- Maintained both Attended and Unattended Robot resources, and provided centralized Robot logs, remote execution, monitoring, scheduling, and work queues using UiPath Orchestrator.
- Interacted with the different send services of mail to send automatic mails and audit logs regarding the task completion.
- Handled exceptions using Try-Catch activity.

- Image based, and Text automation are used in Virtual Environments, for interacting with the application.
- UiPath code Publish to Orchestrator and scheduling the Bots in environments.
- Evaluating a use case as appropriate for robotic process automation able to access and articulate accurate levels of effort to provide data for planning.
- Participate and do the code walk-through and ensure quality of code by performing thorough testing.
- Developed workflow is using RE Framework.
- Investigate any issues in the production environment and raise remediation with the business or log issue tickets as required with other IT organizations.
- Worked with Business Teams to create PDD (Process Definition Document) and developed separate SDD (Solution Design Documents).
- Performed the practical usage of various UiPath Orchestrator functionalities like Bots, Processes, Assets, Jobs, Schedulers, Logging, Recovery Methods, and Application Credentials.
- Provide support post-prod BOT deployment, help conduct Dry-run and resolve prod issues.
- Schedule and run RPA processes to ensure stability of production environment.
- Inspected on PDF Processing, Excel Automation, and various web-based Applications Automation.
- Developed reusable components for efficiency.
- Comply with and help to enforce governance standards, policies, and procedures.

**ENVIRONMENT:** UiPath Studio 2019, UiPath Orchestrator 2018, .NET, VBA, HTML, XML, CSS, JavaScript, SQL Server, Visual Studio.

#### **LENCO DIAGNOSTIC LABORATORY – BROOKLYN, NYC**

**April 2020 – Mar 2021**

##### **Technical Support**

- Troubleshooting computer software and hardware issues, repairs and performing scheduled updates
- Securing the computer's computer network against cyber-attacks, which includes installing antivirus software and ensuring it is regularly updated.
- Application/Software Support (NovaPath and Lab Applications).

#### **EXPERIENCE APIGATE SDN BHD**

##### **TECHNICAL SUPPORT SPECIALIST**

**July 2018 – Nov 2019**

- Communicated with Engineering team and Product team to provide solutions and High-level architecture diagram.
- Experience with Service Oriented Architecture (SOA) and web services technologies (SOAP, REST)
- Worked directly with Product Manager to understand their business models, technical landscape and the problems that they face in delivering to their end-users.
- Set up a GCP Firewall rules in order to allow or deny traffic to and from the VM's instances based on specified configuration and used GCP cloud CDN (content delivery network) to deliver content from GCP cache locations drastically improving user experience and latency.
- Developed API Management system and PaaS Platform with AWS and familiarity interacting with the AWS APIs.
- Created an automated alerting system should there be even the smallest deviation from a steady-state. Designed & developed the Android Application for our client base applications and support

- Managed the company's entire IT department and supervised software engineers and report on daily basis.
- Software research, analysis, review and evaluation, code analysis, requirement analysis, identification of code metrics, system risk and software reliability analysis
- Service Oriented Design & implementing RESTful APIs, SOAP, WSDL, XSD, JSON, Web services and XML
- Managed QA team, system analysis team, developer team, Database administrator, and support & monitoring team.
- IIS Configuration, monitoring, troubleshooting, Optimizing and Performance activities.
- Involved Telco APIs Integration (payment, billing, SMS, USSD) and On-Boarding process to API Gateway.
- Involved SaaS (Content Provider Platform, Payment Gateway, System Integration, Reporting) On-Boarding process to Clients.
- Architected/Implemented (systems integration) solutions in GSM, SMSC, SMPP, and Load Balancer for Telco Systems.
- Designed and developed the ECPAs (External Content Provider Access) platforms that allow third party content providers to make a payment (with telco DCB- direct carrier billing) and Premium/Bulk SMS (A2P and two-way SMS)
