

RAMKUMAR SIRANJEEVI

A versatile, high-energy professional with the credit of executing prestigious projects of large magnitude within strict time schedules, cost & quality, targeting challenging role in **Angular/ MEAN Stack/ Front-end Development** in an organization of high repute, preferably in **Bengaluru/ Chennai/ Coimbatore**.

Bengaluru, India

ramsiran1993@gmail.com

+91 9677189328/ 8525973151

CORE COMPETENCIES

Front-end Development

MEAN Stack & Angular Development

Requirement Gathering

Web Development

Software Development Lifecycle

Code Optimization

Agile Methodologies

Quality Assurance & Control

Troubleshooting, Debugging & Bug Fixing

Cross-functional Coordination

TECHNICAL SKILLS

- **Primary Skills:** AngularJS, Angular, JavaScript, Typescript, Bootstrap, Core Java, Advance J2EE.
- **Secondary Skills:** ReactJS, React Native
- **Tools:** GIT, JIRA, AWS (Amazon Workspace), NodeJS, Vim.
- **Operating Systems:** Ubuntu, Linux, Windows.
- **Database:** PostgreSQL, MySQL, MongoDB

PROFILE SUMMARY

- Performance-driven professional with nearly 7.6 years of rich and extensive experience in Front-end Development.
- Software Development Life Cycle Specialist with excellence in gathering and understanding requirements of clients & other multiple stakeholders.
- Technical acumen, with strong server-side development skills using Node.js and Express.js to build robust and scalable RESTful APIs.
- Highly skilled in designing and developing robust & scalable web applications using the MEAN stack (MongoDB, Express.js, Angular, Node.js).
- Extensive experience of the entire web development process, from front-end design to back-end development and deployment.
- Demonstrate a strong understanding of Angular concepts, including components, services, modules, and directives.
- Rich experience in project management activities including project scoping & estimation, planning and finalization of technical/ functional specifications.
- Possessed exposure to Object-Oriented design & programming concepts.
- Expertise in working closely with business and IT stakeholders to define problems and design large-scale, enterprise class solutions.

PROFESSIONAL EXPERIENCE

Nov'22 - Jan'24 | Senior Software Engineer 2 | Truminds Software Systems Pvt. Ltd., Bengaluru

Role:

- Spearheaded, guided, trained, and instructed a team of 6-7 members.
- Mapped client/business requirements, provided customized software solutions involving finalization of product specifications and selection of appropriate techniques.
- Suggested appropriate technology-based solutions for enhancing functional efficiency and achieving business excellence.
- Stayed updated with the latest trends & advancements related technologies, continuously enhancing professional knowledge and skills.
- Addressed & resolved defects identified by customers in platform areas.
- Collaborated with cross-functional teams to gather requirements & translate them into technical specifications, ensuring alignment with business goals and compliance standards.
- Coordinated entire project-related activities to be in tune with the core business objectives & goals.

PREVIOUS EXPERIENCE

Dec'21 - Oct'22: Doodle Blue Innovations, Chennai as Senior Software Engineer

Jul'19 - Nov'21: Object Frontier Solutions, Chennai as Software Engineer

Jun'16 - Jun'19: Bambee Software Solution, Chennai as Assistant Software

SOFT SKILLS

Analytical
Flexible
Collaborator
Communicator
Team Builder
Problem Solver

ACADEMIC DETAILS

- **B.Tech. (Electronics & Communication Engineering)** from Pondicherry University in 2015 (80.1%)
 - **12th** from Alpha Matriculation Higher Secondary School, Pondicherry in 2011 (81.3%)
 - **10th** from Thamizh Thendral Thiru.Vi.ka Govt. School, Pondicherry in 2009 (85%)
-

CERTIFICATION

- Certified course in Core Java and J2EE in Chennai
-

PERSONAL DETAILS

Date of Birth: 12th March 1993

Languages Known: English, Tamil & Telugu

PROFESSIONAL PROJECTS

Project 1: Dataflow Group (MOHRE, MOSY, SHA)

Tech Stack: Angular 14, Angular 15, Typescript, Angular Material, Bootstrap, AWS Amazon workspaces tool, Restful API lambda.

Description:

- DataFlow Group, a premier global provider, specializes in Primary Source Verification (PSV) solutions, employment background screening, and immigration compliance services.
- IT serves numerous clients, including the development of portals like MOHRE, MOSY & SHA, featuring a centralized payment gateway using iframe handling.

Project 2: Builder (Builder Home, Builder Studio, Builder 360)

Tech Stack: Core Java, J2EE, Angular 13, Typescript, Angular Material, HTML 5, CSS 3, Bootstrap, MongoDB.

Description:

- Managed build cards from the studio portal, encompassing various states in the 360 portal.
- Utilized portal APIs, including those from the builder home portal, to consolidate data.
- Oversaw front-end responsibilities for the builder home portal, aligning development with customer and productologist requirements.

Project 3: MotorDigitalCertificate Platform (MDCP)

Tech Stack: Core Java, J2EE, Angular 7, Angular 9, Typescript, Bootstrap, HTML5 CSS3, MongoDB.

Description:

- Created digital certificates for various companies for public traffic authority purposes and recorded certificate counts for companies & users.
- Implemented email functionality with data visualized through graphs and charts; managed users based on roles, companies, and traffic authority, mapping branches for user logins.

Project 4: Manage 201 (Employee Management Portal)

Tech Stack: AngularJS, NodeJS, Core Java, J2EE, Spring, Springboot, JavaScript, , HTML5, CSS3 and PostgreSQL, MySQL.

Description:

- The Product-Manage-201 is a user-friendly employee management system, enabling seamless access to the HR department with a single button press.
- It facilitates efficient remote monitoring and management of employees across diverse locations.
- The system enhances productivity by supervising employee work reports, incorporating time tracking & conducting comprehensive employee appraisals.

Project Roles:

- Crafted dynamic front-end solutions through responsive web technologies such as JavaScript, AngularJS, Typescript, Angular, HTML5, CSS3, and Bootstrap.
 - Developed APIs for engineering tools, ensuring alignment with industry requirements.
 - Utilized Agile methodology, including participation in Daily Scrum Meetings, Sprint Planning, Sprint Backlog management, and conducting 1on1 meetings.
 - Debugged and troubleshooted using developer tools.
 - Implemented core functionalities and created reusable UI components, along with the development of custom directive components.
 - Wrote Unit test cases to validate new implementations.
 - Developed responsive web applications & conducted client-side validations.
 - As a member of the Electronic Invoicing Enterprise Application Team, service APIs were designed and built.
 - Writing Database stored procedures & generating XML files was attained.
 - Documentation for functional and database tables was completed.
 - Functionality was built & implemented for web application development, as well as for secure management of users' needs.
-
