EXPERIENCE

Mid-Frontend Engineer
Assima (The Scalers) Feb 2021 - Present

- **Assima** is a Learning Management System (LMS) which creates hyper-realistic simulations of any application to provide solutions for employee onboarding, remote training, new software rollout, etc
- Worked on building a web application from the scratch on tech-stack like Next JS, React Js, Typescript, Material UI, React Query
- Familiar with working on Micro-frontend Architecture.
- Strong background on writing unit test cases using Jest and React testing library
- Restful client generation using Open API generator.
- Worked on Package development
- Collaborated with backend developers to implement solutions
- Worked on small teams where individual contribution was highly valued

UI Engineer
Care.com (Hurits Consulting Private Ltd) / July 2020 - Jan 2021

- **Care.com** is an online marketplace for childcare, senior care, special needs care, tutoring, pet care, and housekeeping through membership in a two-sided marketplace
- Developed front-end web pages using HTML5, CSS3, Javascript, jQuery
- Worked on building the application with the emerging technologies like React JS, Typescript, Next JS
- Used Graph QL to make API calls along with Apollo Client
- Participated in peer code reviews

UI Developer

Valtech India System Private Ltd / Feb 2017 - Feb 2020

- Worked on projects like **Linde**, **WeightWatchers**, **Emerson** mainly focussing on the E-Commerce platform
- Involved in various phases of Software Development Life Cycle (SDLC)
- Converted wireframes and performed front-end web development with HTML, CSS, LESS, Bootstrap and RWD
- Improved project platforms using JavaScript, jQuery, AJAX and Underscore template to develop rich User Interfaces
- Integrated web page with backend using AJAX and JSON
- Developing cross browser compatible and standard compliant CSS based page layouts
- Worked closely with the QA team to understand the reported bugs and fix them
- Interacted with backend developers to implement solutions
- Worked on a React JS application
- Followed AGILE methodology and used GIT for the version control

ADDITIONAL ACTIVITIES

- Participated in "TechGirl" event and trained students on HTML and CSS
- Conducted KT sessions on new technologies to the team
