ABOUT ME

Skilled Pentaho end to end BI developer with diverse experience in utilizing PDI tools like Pentaho Data Integration, Pentaho CDE, Pentaho report designer, Pentaho Analytics for an end-to-end BI deliverables and fluid understanding of many programming languages including Hadoop, Impala, Hive, Java, JavaScript, SQL, InfluxDB, HVS (Hitachi Visualization suite).

Worked on multiple projects as Pentaho ETL Senior Developer.

I have Experience working in both Pentaho Community and Enterprise Edition.

EDUCATION

Solapur University

Bachelor of Engineering

SKILLS

Pentaho

Expert

Pentaho Data Integration
Pentaho CDE
Pentaho Report Designer
Pentaho Analytics
Pentaho BA Server
Schema Workbench

Secondary Skills

Intermediate

Java
JavaScript
Hadoop
SQL
PostgreSQL
Hive
Impala
InfluxDB

EXPERIENCE

Hitachi Vantara

2020 - 2021

[Pentaho Senior developer, Manchester Piccadilly](#)

The Manchester Piccadilly project is a UK based project wherein goal is to analyze a High Volume Data of the incoming and the outgoing people on the train stations with near to run time analysis of the rules violations and near to run time generation of sms alerts.

Winner of the HI FIVE award for this project.

Hitachi Vantara

2019 - 2020

[Pentaho Senior developer, HDFC Bank Ltd](#)

This is a Big Data Hadoop project, wherein we had to migrate the existing SQL code and SAS code to Pentaho to run the Loan Management Campaign. The Objective of this project was to execute the campaign process, i.e. to qualify the customer eligibility for various products like Auto Loan, Personal Loan, and Two Wheeler etc.

Developed logic to replicate the functionality of SAS code and SQL code into Pentaho data Integration.

Constructed a conceptual and a logical model of an ETL workflow with performance optimization.

This Project got the Customer Excellence Award in Q4 FY'19 Quarterly Award.

OHUM HealthCare Solutions

2016 - 2019

[BI end to end Developer](#)

For 3 years, I was a part of the OHUM HealthCare Solutions, developing ETL data warehouse for OHUM and other clients of OHUM.

Tools used were Pentaho Data Integration, Pentaho report Designer, Pentaho C tools, Schema workbench, Pentaho Analyzer, Pentaho BI Server, MySQL, PostgreSQL and Java.

Development of the end-to-end BI Solutions i.e., set up Pentaho Server, Developing ETL jobs, populating DataMart's, development of the reports and dashboards.
