PROJECTS

Customer Genomics

Role: Project Lead / Sr. Developer

It is advanced analytics representation of data via charts.
API Based Callout to retrieve data and Show it on VF pages and created charts via Am-charts.
Dynamically fetching the data from 3rd party through REST API.

PENROD

Role: Project Lead / Sr. Developer

Developed the LWC component via VS code.
This Application represents the LWC components instead of lightning component. We are using the events in the LWC to fetching the data.

GRC Pulse

Role: Sr. Developer

Developed the mobile push notification whenever new task is getting created inside the org.
Most of the functionality in this org is single page.

AG TAX Deliverables

Role: Sr. Developer

It is the centralized cloud computing technology based on the application that brings all of the Deliverable and their Review and frontloading Checklist together. Generate the PDF For different record of Deliverable and Organizers.

CAA

Role: Sr. Developer

Developed the customer community as per customer need.
Integrated with the Litmos platform to purchase course and certifications, also developed the user interface in SF to display the course retrieved from 3rd party and given the capability to download certification for that particular user.
Developed the functionality to purchase membership based on the user levels.

Volunteer Management System

Role: Developer

It is application that Store all of the Volunteer sign up with help of salesforce sites and registration for particular job with job code store all information into salesforce custom object.
