## Work EXPERIENCE

### Apptio, Bangalore — Software Development Engineer

FEB 2020 - PRESENT

Worked on many modules for Apptio's product i.e Cost Transparency, Technology Business Management.

### Yodlee, Bangalore — Senior Software Engineer

OCT 2015 - FEB 2020

Started my career with Yodlee in 2015 as an ASE and worked as a developer for multiple Fintech products.

## PROJECTS

### SSR (Self Service Reporting) Insight:

Developed Self Service Reporting insight tool, where users can upload the business data and get all the insight related to Capex, Opex etc. This can be used in IT operations to plan and forecast expenses.

### IAV (Instant Account Verification):

Reduced Latency to improve response time of IAV by 60% of top 20 sites. Which ensures Fast, efficient, secure online account verification.

Implemented the Business logic for top US banks which uses IAV API.

### PFM (Personal Finance Management):

Developed a new feature "Investment Holding FinApp" in Personal Financial Management product.

Using Investment Holdings FinApp, consumers can get a consolidated view of their holdings and an in-depth look at individual stocks.

### JDAP (Data Aggregation Platform):

Implemented chrome browser integration in place of IE browser

Developed new feature i.e. Transaction, validation framework for data quality.

### Utility API development and Assignment tool:

Developed parallel processing API which reduced the processing time.

Developed an Assignment Automation tool which help to Automatically
