Python	●	●	●	●	○
JavaScripts/SuiteScripts	●	●	●	●	○
C++	●	●	○	○	○
Java	●	●	○	○	○
Android Development(Basics)	●	●	●	○	○

## PERSONAL PROJECTS

Drona 2.0 (01/2019 - 04/2019) [↗](#)

- Anonymous rating and review android app for teachers and students where we could have a unbiased system to give feedback to each other and help in growth of acedamics.

Keeper (09/2019 - 09/2019) [↗](#)

- Basically It was a password protection python script. It was 2 AM and i realized that i often keep forgetting my own passwords a lot. There were few solution software but i felt it was really scary to someone else control your private information. so i created this python script that took input as username and password and then encrypt those and save into the system itself.
- I wrote it in maybe one or two hours but it was really beautiful and simple in design.

## RECENT HABBIT

Weekend of Code (01/2020 - Present)

I was fascinated and inspired by competitive programming so i started this habit in which i try to solve new Coding problems on every weekend. It Keeps me Productive.

## CERTIFICATES

Python Development Advanced - Coursera  
(05/2020 - Present)

It was deep dive course of python that improved my python skills marginally.
