Bachelor of Technology
Techno India, Salt Lake

📅 August 2014 – May 2018

PROJECTS

Pens.com Ecommerce Website

- Ecommerce Website for National Pen, allows users to place orders for customized goods.
- TechStack : Java, NodeJS. ExpressJS, GraphQL, Spring Boot, ReactJS, AWS, Magnolia.
- Worked on the Performance optimization on Homepage and Product Page redesign.
- Helped setup Sitemaps for the website across 25 locales.
- Helped migrate the website from an older techstack of jquery to a React SPA application.

Data Warehouse Tools (DWT)

- A web application to monitor and manage Jobs run by the DSS scheduler. This project was to re-write the existing VB based Desktop Application to a new TechStack.
- TechStack : NodeJS. ExpressJS, GraphQL, Spring Boot, ReactJS and Docker.
- Worked on the initial prototype for DWT, which was really appreciated by the Global team.
- Helped setup Jenkins Builds and Creation of Docker images for DWT successfully. Worked on both Frontend and Backend of the project.
- Setup Security measures for the Application Like Single SignOn with help of SAML 2.0.
- Helped setup session logoff and session time-out and integrated the new application with the existing suite of applications.

HealthCare Intelligence User Interface(HIUI)

- Healthcare Intelligence UI is a dashboard which provides a common platform to access all suite of applications under Healthcare Intelligence.
- Helped migrate HIUI java components from AdoptOpenJDK 8 to AdoptOpenJDK 11.
- Techstack: Angular, Java(Spring), MongoDB.

Install-IO

- Framework to deploy Healthcare intelligence UI software to clients and then onboard the clients to the latest version of Healthcare Intelligence UI.
- TechStack used for Install-io NodeJS MongoDB.
- Worked on Install-io to add a number of features and helped debug a number of issues in production.
- Helped migrate install-io from NodeJS 10 to NodeJS 12.

Key Performance Indicator(KPI)

- One of the applications under the HIUI suite of applications used to create and manage KPIs.
- KPI has a REST APIs written in Java(Spring) and the Front End is written in AngularJS
- Helped Implement a major architectural
