Career Objective and Goals

One of my Primary Objective is to work with my full Potential, Confidence, Intuitiveness, and Assuring for the best of my ability. Aligning my goals along with Organization goals to grow together.

- **Short term goal**: To grow and strengthen my technology stack as much as possible. To deliver efficient work-output by understanding the work-principles of the company with skillsets. I possess and hence to gain valuable experience to grow as an efficient Software-Professional.
- **Long term goal**: I have learned that long-term goals are best achieved when we break them into short term goals. My long-term goal is to become technically strong that will put me in a forward-moving company with solid performance and future projections. As part of a team, I want to add value and continue to grow along with the company.

Professional Summary

Specialization:

Jitterbit, Dell Boomi and SnapLogic an API transformation platform and Cloud integration platform for SaaS, On-prem and Cloud Apps.

Holds Total 6.5+ years of IT industry experience.

Jitterbit Harmony, Dell Boomi, SnapLogic and other Skill Expertise:

- Good Hold of understanding Jitterbit Harmony Platform which features local as well as cloud agent and custom API subscription etc.
- Great Exercise with Web Management Console which is the best part of Jitterbit Harmony.
- Excellent in developing Scheduled Integration.
- Hands on experience in Jitterbit and JAVA Scripting.
- Very Familiar with Salesforce Outbound Envelope Web Service Description Language.
- Handled RESTful Web Services and SOAP WSDL's in Jitterbit Operations very well.
- I have been offering and implementing great implementation ideas to client to save subscription cost and time.
- A very good end to end, multi-application, and multi-vendor agile project development experience.
- I have also good understanding of Salesforce.com, object relationship, APEX REST and SOQL's etc.
- I have intermediate knowledge on Dell Boomi and SnapLogic cloud integration platform on which I have built several integrations.
- My strong planning, documenting and program development skills makes me confident and helps in delivering the best solutions for information management system to client as per their need.
- I believe, I am an active listener, self-challenger, self-motivator, self-learner, having strong analytical, planning, and problem-solving skills.
- I have worked with 20-30 team members in a collaborative way which makes me a good team player.

Experience Summary

Company Name and Designation: Solution Architect at Valta Technology Group.

Project Name:	Valta Tech Invoicing Project
Duration:	Mar 2021 to Aug 2022
Description of the Project	• Office 365 based Mailbox Setup, Document AI software System DocSumo, Coupa ERP, Jitterbit Middleware, MySQL Database based Jitterbit Invoicing Integrations
Roles and Responsibilities	• Built a middleware integration which retrieves the Invoice PDF from an Office 365 based mailbox using Jitterbit's Email POP3 plugin. • Consumed the REST APIs of Document AI software System DocSumo to convert the JSON output files to Standard Invoice cXML file in Jitterbit Middleware Integration Project. • Developed a Jitterbit Middleware Integration project to Manipulate, Validate the cXML prepared from JSON and transform it into a complex CSV to be send it to Coupa SFTP. • Consumed the Coupa REST API for getting Invoice details to be used for building Middleware logic. • Refined the above built project following Jitterbit best practices.

Project Name:	Peppol Analytics
Duration:	Mar 2021 to Aug 2022
Description of the Project	• Peppol based REST API, Jitterbit Middleware, MySQL Database based Jitterbit Integrations
Roles and Responsibilities	• Built a middleware integration which retrieves the SML and SMP details of Peppol Direcotry. • Store the SML, AP and SMP details in MySQL Database manipulating and structuring the SML and SMP information.

Project Name:	Event Invoicing Project
Duration:	Mar 2021 to Aug 2022
Description of the Project	• Office 365 based Mailbox Setup, Document AI software System DocSumo, Coupa ERP, Jitterbit Middleware, MySQL Database based Jitterbit Invoicing Integrations
Roles and Responsibilities	• Refined a middleware integration which retrieves the Invoice PDF from an Office 365 based mailbox using Jitterbit's Email POP3 plugin. • Consumed the REST APIs of Document AI software System DocSumo to convert the JSON output files to Standard Invoice cXML file in Jitterbit Middleware Integration Project. • Developed a Jitterbit Middleware Integration project to Manipulate, Validate the cXML prepared from JSON and transform it into a complex CSV to be send it to Coupa SFTP. • Consumed the Coupa REST API for getting Invoice details to be used for building Middleware logic. • Refined the above built project following Jitterbit best practices. • Handled the Production Incident with several Change Requests

Project Name:	Hammond Care Invoicing Project
Duration:	Mar 2021 to Aug 2022
Description of the Project	• Office 365 based Mailbox Setup, Document AI software System DocSumo, Coupa ERP, Jitterbit Middleware, MySQL Database based Jitterbit Invoicing Integrations
Roles and Responsibilities	• Refined a middleware integration which retrieves the Invoice PDF from an Office 365 based mailbox using Jitterbit's Email POP3 plugin. • Consumed the REST APIs of Document AI software System DocSumo to convert the JSON output files to Standard Invoice cXML file in Jitterbit Middleware Integration Project. • Developed a Jitterbit Middleware Integration project to Manipulate, Validate the cXML prepared from JSON and transform it into a complex CSV to be send it to Coupa SFTP. • Consumed the Coupa REST API for getting Invoice details to be used for building Middleware logic. • Refined the above built project following Jitterbit best practices. • Handled the Production Incident with several Change Requests. • Added and Implemented the Invoicing Items level captured Functionality which captures tabular Invoicing Items related data from DocSumo JSON based file and then transformed through standard Invoice cXML file, which then gets compared with Coupa's REST API based JSON data to produce the final Invoice CSV file to be pushed into Coupa SFTP.

Project Name:	Peppol Invoice Integrations
Duration:	Mar 2021 to Aug 2022
Description of the Project	• Peppol Directory, Jitterbit Middleware, TechnologyOne REST API, MySQL Database based Jitterbit Invoicing Integrations
Roles and Responsibilities	• Consume Peppol Directory based REST APIs for Invoice details. • Transform the cXML and post it to TechnologyOne REST API's

Project Name:	Event Vista Project
Duration:	Mar 2021 to Aug 2022
Description of the Project	• Coupa ERP, Jitterbit Middleware, Coupa SFTP, Vista SFTP, MySQL Database based Jitterbit Invoicing Integrations
Roles and Responsibilities	• Built Items Integrations – Pull Coupa SFTP based CSV file and send it to Vista SFTP and Vista SFTP based complex CSV to MySQL Database. • Developed Receipt Integrations – Handled multiple receipts by splitting the Complex CSV files.

Project Name:	Cumulo9 Invoice Integration Project
Duration:	Mar 2021 to Aug 2022
Description of the Project	• Cumulo9 SFTP and Peppol SFTP.
Roles and Responsibilities	• Cumulo9 SFTP to Peppol SFTP Invoice integrations and vice versa.

Project Name:	Efficiency Leaders Invoice Integrations
Duration:	Mar 2021 to Aug 2022
Description of the Project	• Peppol Directory, Jitterbit Middleware, Efficiency Leaders REST API, MySQL Database based Jitterbit Invoicing Integrations
Roles and Responsibilities	• Consume Peppol Directory based REST APIs for Invoice details. • Transform the cXML and post it to Efficiency Leaders REST API's

Company Name and Designation: Technical Analyst at Jade Global India Ltd.

Project Name:	Cloudflare
Duration:	Mar 2020 – Feb 2021
Description of the Project	• Salesforce sales cloud CRM, Workday, NetSuite Oracle ERP, Oomnitza, SAP Concur, Coupa, and RevPro based Boomi Integrations.
