## Certificates

Salesforce Certified Platform Developer 1

## Experience

Sep 2018 – Till Date
**Genpact Pvt. Ltd., Noida**-*Assistant Manager*

### Project: Cora AP

Cora AP Flow is an end to end Accounts Payable automation solution that eliminates nonstandard manual processes & high cost of operations through its automated workflow. Its self service portal brings higher visibility and drives supplier satisfaction. We have used **Visualforce, Apex, Process builders, Async Apex, Lightning aura components, Javascript/Jquery, HTML, CSS** in development and maintenance of the product. Cora AP Flow  removes process constraints, optimizes payment speed & accuracy cuts Operational Costs,  Provides Global Visibility, automation & control of the full payable life cycle. This product also involves a Helpdesk module which provides email to case functionality to provide Customer relationships functionality. This

module having capabilities to communicate between vendors and executives via emails to resolve queries and provide inputs.

Aug 2017 – Sep 2018
**Erudite Works, Navsari**-*Sr. Software Engineer*

### *Project: Demand Side Management Tool (DSMT)*

The goal of demand-side management is to encourage the consumer to use less energy during peak hours, or to move the time of energy use to off-peak times such as nighttime and weekends. The major focus in this from our side was on financial incentive calculation, CSR Console (which is used by customer care executive to attend customers), Team management tool  for availability of worker on site.
We have used **Visualforce, Apex, Javascript/Jquery, HTML, CSS** in development and  maintenance of the product

June 2016 – Aug 2017
**Sailfin Technology, Surat**-*Sr. Software Engineer*

### *Project: ESM*

ESM (Enterprise Supply Management) is a Genpact product which developed by us in **Salesforce**  and outsourced by them, so day to day tasks involves taking routine updates from them and  coordinating that within the current development process. In that I managed development of new  component/request, code reviewing and optimizing code in the best possible way. I also took part in learning new enhancements released by salesforce which and try to implement  them in current development process.
**At Sailfin technologies with a team of 3, we have implemented and migrated whole product to lightning framework from Salesforce classic.**
We have used **Lightning Framework, Lightning Design System, Visualforce, Apex, Agile, Heroku Portal, Javascript/Jquery, HTML, CSS** in development and maintenance of  the product

July 2013 - May 2016
**Finlogic, Surat** - *Sr. Executive*

### *Project: PSS*

PSS(Points Scoring System) project is basically for getting points from AMCs and giving points to brokers who bring business to the Company by Mutual funds, FDs, Realty. To achieve this there many factors on which points are calculated and allotted to a person. For that we have managed a huge backend and a frontend. After giving points from the backend we show reports and points can  be redeemed at the end of the year.
**Software/Platform/Tools: J2EE[JSP, Spring] Back End : ORACLE,MYSQL**
