PROFESSIONAL EXPERIENCE:

1. GlobalLogic

Designation: Product Owner

Duration: November 2020 – Till date

Tasks:

- Responsible for developing the requirements of the project from the scratch.

- Involved in technical discussions and creation of technical backlog for the project.

- Working on requirements gathering and analysis to create epics, features and user stories.

- Reviewing test plan and strategy documents, test scenarios and test cases.

- Working with client on a regular basis to streamline the requirements and to better understand the customer's perspective.

2. Deloitte

Designation: Assistant Manager / Product Owner

Duration: December 2014 – November 2020

Tasks:

- Working as Lead Business Analyst in implementing an online version of an audit desktop application used by the auditors.

- Hit the ground running and worked as the Lead Business Analyst on a business-critical enhancement within three months of joining the firm. This functionality received zero-enhancement requests after UAT.

- Responsible for delivering functionality that produced nominal number of defects consistently across two major releases.

- Working on projects that improved Audit quality by delivering functionality that complied with PCAOB standards and tailored existing functionality to meet requirements of Deloitte's legal department.

- Writing user stories and acceptance criteria by translating client requirements along with creating use cases, process flow diagrams, functional specification and design documents, mockups and building performance measurement profiles.

- Reviewing test plan and strategy documents, test scenarios and test cases.

- Working on testing and releasing functionalities that enhanced user productivity by 80% with the help of my background in testing methodologies.

- Conducting regular conference calls with major Deloitte member firms to gather requirements, conduct UAT sessions, and schedule monthly checkpoints.

- Leading the sprint planning sessions with the team for gathering estimates and effort required for completion of user stories.

- Conducting routine Production Support troubleshooting and remediation strategies.

- Authoring user guides, release notes, and functional requirements documents at the end of a release and storing on TFS.

- Worked with the Project Manager to handle and document change requests and assisted in creating Statement of Work, resource-tracking matrices, traceability matrices, issues - gap - risk lists, and status reports at both Program-level and for specific projects.

- Have been a liaison between the client and the team to ensure a mutual understanding of requirements and deliverables by either party.

3. **Cognizant Technology Solutions**

Designation: Programmer Analyst

Duration: September 2011 – October 2014

Tasks:

- Participated in defect triages, defect analysis and resolution meetings.

- Worked with the development team to understand the data model and execute SQL queries.

- Created business specification document and functional specification document.

- Reviewed high-level and low-level design documents.

- Assisted the project management team in creating vision, scope document, and project plan.

- Performed system testing, system integration testing, browser compatibility and regression testing along with QA team.

- Performed database testing using SQL, Mobile testing, Cross Browser Testing, Translation testing, API Testing, Backward Compatibility Testing and adept in the usage of Quality Centre tool.

- Worked as an SME for two projects and provided guidance on the business aspect of the application.

- Experienced in handling a team of 3-8 members. Successful in helping team members to enhance their skills by providing relevant training and mentoring which in turn helped in the creation of stronger project teams.

- Championed the creation and usage of Requirements Traceability Matrix in a project for better understanding of requirements and code coverage.

- Led cross-departmental communications initiative to enhance information and knowledge sharing between different workgroups.

CERTIFICATIONS & ACHEIVEMENTS:

- ISTQB Certified Tester (Foundation Level) from NIIT

- Certified in Level 0 Software Testing from Cognizant

- Certified SAFe 4 Teams Practitioner

- Received an Outstanding award from Deloitte for efforts in a project.
