SOFTWARE ENGINEER | SOFTWARE DEVELOPER | JAVA DEVELOPER

MICROSERVICES ARCHITECTURE ■ TEAM MANAGEMENT ■ TECHNOLOGY SOLUTION DELIVERY ■ WEB & ENTERPRISE APPLICATION DEVELOPMENT ■ CLIENT ENGAGEMENT

❑ PROFILE SYNOPSIS

- ✓ **Pragmatic Technologist** with <u>17 years</u> of expertise in architecting distributed applications that are well tested, easy to support and enhance
- ✓ Stellar track of leading major projects and software teams to provide support structures while delivering cost-effective **techno-functional solutions**
- ✓ Developing scalable enterprise-level back-end solutions while following SDLC including planning, production rollout and delivery
- ✓ Successfully designed and developed critical functionalities for applications resulting in cost and time savings of **50%**
- ✓ Delivers a consultative framework for the development of software and system while determining functional & non-functional requirements
- ✓ Expertise in Service Oriented Architecture; deft in architecting in **Java, Springboot, JPA, Hibernate, REST, MicroServices, SQL, GIT Maven**

Corporate stints with BK Software Services Pvt Ltd ■ Polaris Consulting ■ Wipro Technologies ■ Cognizant Technology ■ IBM India Pvt. Ltd. ■ SkyTech Technology Solutions Pvt Ltd

❑ CORE COMPETENCIES

Software Architecture	Information Management Practices	Technical Design and Solution
SOA, APIs, Open Data and Microservices	System Development Life Cycle Management	IT Services Management
Designing of Enterprise Applications	SaaS, Infrastructure as a service (IaaS), Platform as a service (PaaS)	Production Deployment Support
Scrum Framework & Code Review		Event-Driven IT & Predictive Analytics
Retail Corporate Online Banking Systems	System Authentication (Retail Banking with Gemalto)	Trigger Frameworks

❑ CAREER CONTOUR

JAVA TECHNICAL LEAD
BK Software Services Pvt Ltd., **Bangalore**   ---**Since April '20**

- Architect integrated solution in collaboration with project delivery team while ensuring documented technical scope with a defined set of accountabilities, responsibilities and 'hand-offs' between parties
- Devise SOA based applications and brainstorm to facilitate the business in delivering its strategic objectives rather than just responding to a pre-defined request
- Ensure solutions align with IT and group architecture strategy, principles and design patterns while working with the Enterprise Architecture team
- Determine project requirements and developing work schedules for the team; delegating tasks and achieving daily, weekly, and monthly goals
- Conjoin with Project Managers and Lead Solutions Architects to ensure the outcomes delivered by projects are consistent with the original solution specified
- Provide stakeholders with ongoing visibility and control over the architecture while engineering processes for IT systems delivery programs
- Contribute to a team of Solution Architects, providing governance of consensus-based scalable and adaptable architectures including peer reviews and design authorities
- Identify risks and form contingency plans while optimizing operations and scheduling training sessions and meetings to discuss improvements

Project Handled: Online Game Application
- Provide and engineer a solution for web & enterprise applications while educating team members on functional and technical areas
- Ideate and design enterprise applications while providing solutions as per client requirements
- Strategize performance improvement initiatives for the applications; assisting team members to cope up with the applications

Technologies worked on: Spring Boot, Hibernate, JPA, Web Service, MicroServices, Maven, Git, Junit, BitBucket & GitLab and AWS

ASSOCIATE MANAGER (Client Served } Emirates NBD & CITI Bank)
Polaris, Chennai   -- **Jan'18-Apr'19**

- Partnered with business and technology subject-matter experts to elicit and translate business needs into technology solutions
- Spearheaded the overall coordination, status reporting, financials, schedules and stability of project-oriented work efforts, ensuring that project goals and objectives are met within the agreed time, scope and resource requirements
- Drove efficiencies through coaching, knowledge sharing and the use of standards, patterns and frameworks; offered ongoing design support through the project from solution ideation, design to implementation
- Ensured compliance of designs to business functional and non-functional requirements while adhering to IT vision and strategy, architecture guidelines, regulatory requirements, and industry best practice
- Capitalized opportunities to maximize client satisfaction and augment revenue streams associated with a project
- Worked with Product Managers, CIOs, Business Analysts and technical teams to understand product requirements and platform capabilities
- Defined end goals for the team while working with the team to ascertain and fix technical problems

- Governed system modifications; ensured that software and applications are updated; performed security audits to identify areas of improvement

Project Undertaken: Citi-Connect for Files

- Led successful competition of Payment Gateway Integration Development while guiding team members on functional and technical areas
- Worked in retail & corporate banking development; designed and architected the enterprise applications
- Provided performance improvement to the applications

Technologies worked on: Spring, Hibernate, Struts, JPA, Web Service, MicroServices, Spring Boot, Maven, Git, JUnit

TECHNICAL LEAD (Client's Served } Citi Bank)
Wipro Technologies -- **Nov'10-Dec'12**

- Assessed the completeness of the overall application template architecture for application functionality, data, integration, IT infrastructure
- Provided technical leadership on key architecture decisions and acted as a point of technical escalation for the Engineering teams delivering design
- Liaised with peer Architects and diverse Engineering teams across infrastructure, platform, application, data and corporate services to form end-to-end solution designs which meet business needs
- Engaged with key stakeholders internal and external to understand user requirements while working with the Business Leads and other development leads to implement technology transformation plans
- Offered inputs in creating a new version of an existing software system to include additional requirements and desires of the client
- Leveraged C# to extend and create custom-programmed functions from the context menus

Technologies worked on: Ajax, jQuery, JavaScript, Spring, Hibernate, Web Service, FTP, SFTP, JUnit

SENIOR SOFTWARE DEVELOPER (Client Served } The Bank of New York Mellon)
Cognizant Technology -- **Oct'08-Nov'10**

- Ensured awareness, involvement and support from the key stakeholders; developed strong project teams and maintaining robust communication on the project status throughout its life cycle
- Managed risks and issues while driving all stakeholders to deliver on time and to the required quality standards
- Determined operational feasibility by evaluating analysis, problem definition, requirements, solution development and proposed solutions
- Architected software solutions by meticulously studying information needs; studying systems flow, data usage and work processes while investigating problem areas and following the software development lifecycle
- Documented and demonstrated solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments and clear code

Technologies worked on: Spring, iBatis, Oracle PL/SQL

SYSTEM ENGINEER (Client Served } Maersk Logistics)
IBM India Pvt. Ltd. Kolkata. ---**Apr '07- Oct'08**

- Oversaw the development and installation of new networking and computing infrastructures; monitored systems in the existing network to ensure there are no productivity set-backs
- Conjoined with engineering professionals within the company to maintain hardware and software needed for projects to be completed efficiently
- Architected enterprise application for one of the world's largest logistics provider Maersk Logistics
- Managed all installed systems and infrastructure in line with company guidelines or SOP (standard operating procedure)
- Assisted in the coordination of various teams testing and evaluating for the development of design and its implementation of the best output

Technologies worked on: JSP, Servlet, EJB, DAO, XML, XSL, XSLT, PL/SQL and Oracle

ASSOCIATE SOFTWARE ENGINEER (Client Served } United Airlines)
SkyTech Technology Solutions Pvt Ltd., Kolkata -- **Jul'04-Mar'07**

- Served as a software developer for United Airlines in 3-tier enterprise applications and championed new technologies and approaches
- Liaised with our operational support teams to ensure solutions are supportable, scalable and reliable
- Assisted in the documentation of new or existing programs to ensure information accessibility, as required
- Leveraged programming language and technologies to provide creative and practical solutions to a range of technical problems

Technologies worked on: JSP, Servlet, Struts, EJB and Oracle

❐ ACADEMIC CREDENTIALS

2004 || Masters of Computer Application from Jadavpur University ■ 2001 || Bachelors of Science from Jadavpur University

Certifications: SCJP Certified Java Programmer in Java 5 **|** Brainbench Certified Java Programmer in Java 6

❐ TECHNICAL PURVIEW

- Core Java, Spring Boot, Spring, Hibernate, JDBC, JPA, iBatis, Maven, MDB
- Weblogic, WebSphere, Apache Tomcat, JDK4, JDK5, JDK6, JDK7, JDK8
- J2EE Architecture, Design Pattern, UML, Eclipse, JUnit, Git, BitBucket, GitLab
- Web Services, SOAP, REST, Micro Services, Amazon Web Services (AWS)
- HTML, CSS, JavaScript, J, Servlet, Struts
- Adobe Flex, Action Script, Cairngorm, TIBCO EMS Client Programming
- PL/SQL, Oracle, SQL Server, Object Grid, Compute Grid
