June 2013

INTERSHIP EXPERINCE

I have done six months internship as a Linux system administrator in Priar Techno World. (10th November 2019 to 10th April 2020)

PROJECT

AUTOMATIC STORAGE DETECTION (Based on IoT) APRIL 2019

In this IoT project we trying to show how external device is connected to hardware and software system and shares the information to other system. We have built an IoT device in which we will print on 8*8 LED MATRIX. We are trying to bring security in educational field. when someone tries to cheat or copy data from the system by connecting pen-drive to it, as all the systems are connected to same network so automatically it will print system name on led matrix and buzzer will beep. We will come to know on which system pen-drive is connected.
