WORK EXPERIENCE

INFOSYS | DIGITAL SPECIALIST ENGINEER | PUNE, INDIA

| Aug 2021 – Present

- As an Angular developer played a pivotal role in propelling the development and upkeep of **responsive Single Page Applications (SPAs)** using **HTML, CSS, JavaScript, TypeScript, and Angular**.
- Spearheaded a comprehensive user interface transformation that culminated in an impressive **40 percent augmentation in data visibility**. This endeavor included utilization of **HTML, CSS, and Angular**, resulting in the introduction of advanced network-level reporting capabilities.
- Harnessed the power of **browser APIs, HTML, and CSS** to fine-tune frontend performance, propelling the application to new heights.
- Elevated frontend interaction with diverse microservices by orchestrating a remarkable **20 percent reduction in page load times**. This feat was achieved by harnessing the prowess of **Angular, TypeScript**, and conducting comprehensive **Jasmine unit testing**, underlining my expertise in application optimization.
- Crafted and executed an exhaustive arsenal of over **500 test cases**, ensuring the impeccable implementation of critical business functionalities. My commitment to quality led to an impressive **code coverage rate of over 90 percent for each component and service**.
- Undertook a critical role in aligning our development with user requirements by **engineering more than 50 reusable UI components** accomplished using **Angular**, consistently delivering code that epitomized efficiency and codebase harmony.
- Expanded the application's scalability, enabling it to effortlessly accommodate a growing workload and user base.
- The product admirably navigated the challenge of **handling 100,000 track miles and managing 20 million annual lift transactions**, underscoring the unwavering robustness and efficacy of our Angular-based application.
- Continuously drove process and codebase improvements. Implemented best practices, code reviews, and developer collaboration to maintain the codebase's efficiency and consistency.

PROJECTS

IBLOG [↗](#)

HTML, SCSS, ANGULAR, JAVASCRIPT, MATERIAL UI

- Utilized **HTML, SCSS, JavaScript, and Angular** to create a single page application that empowered users to seamlessly post blogs and articles via an intuitive admin panel.
- Implemented user role-based access control resulting in a remarkable 50 percent reduction in unauthorized access incidents. This not only enhanced security but also optimized content management, significantly boosting user satisfaction.

SABA FASHION [↗](#)

HTML, SCSS, ANGULAR, JAVASCRIPT, PRIME NG

- Pioneered the design and implementation of an intuitive admin panel for SabaFashion, **slashing client management time by an impressive 40 percent**, while simultaneously **elevating product data accuracy by 25 percent**. The enhanced data accuracy further catalyzed the efficiency of invoice processing.

SKILLS

- **Web Development:** Angular, HTML5, CSS3, CSS preprocessor(SAAS), JavaScript, TypeScript, Jasmine, Bootstrap, Postman, Swagger
- **Technology:** Git, Visual Studio Code, Postman, Swagger
- **Soft Skills:** Team Work, Leadership, Client Communication

AWARDS

- **Insta Award 1:** Went the extra mile to deliver the work on time.
- **Insta Award 2:** For being a great contributor to the UI development team, and delivering work with great quality.
- **Insta Award 3:** For successful delivery of complex features on time and with great code quality.

CERTIFICATION

- Infosys Certified Angular Developer
