WORK   Accenture   Nov 2018 — Present
EXPERIENCE   Software Engineer

PROJECTS

TRADE PROMOTION MANAGEMENT - UNILEVER

Trade Promotion Management processes to focus on relationships rather than paperwork. Create a stronger connected customer experience by empowering management and field sales teams with the agility to execute more successful sales plans, merchandising, trade promotions and in-store programs for brand growth, all using Salesforce. Enable sales teams to make the right selling decisions, in the right store, at the right time.

Responsibilities:

- Involved in requirement gathering, technical designs, development, unit testing and deployments using GIT, Jenkins and Stash.
- Worked closely with business analysts throughout the development cycle ensuring the proposed design met customer requirements.
- Worked on agile methodology and project management tools like JIRA and Confluence.
- Development on the top of Accenture cloud managed package.

Configuration and Customization Used:

- Validation rules, workflow rules, process builders, custom metadata, custom settings, labels, profiles, permission sets, sharing rules, page layouts, email templates, etc.

- Extensively used asynchronous and synchronous apex : apex classes, triggers, batches, schedulers, etc.
