Experience

Capgemini

GAR, Hyderabad

ASSOCIATE CONSULTANT

December 2020 - Present

- Being a part of requirements discussions, feasibility study and breaking the requirements into BDD stories
- Attending and facilitating backlog refinement sessions with Business Analysts and client to ensure the readiness of sprint stories.
- I implemented REST based java applications in a micro-service architecture with Kafka as an event streaming platform middle-ware
- I wrote unit test, integration test for the implemented code.
- I implemented feature testing using cucumber feature files in Gherkin and JUnit Runner.

Capgemini

GAR, Hyderabad

SENIOR SOFTWARE ENGINEER

August 2019 - December 2020

- Wrote REST based java applications in a micro-service architecture
- I wrote unit test, integration test for the implemented code using Junit/Mockito framework and MockMvc or Test Rest Template.
- Developed code fixes and enhancements for inclusion in future bug fixes

Team Road Runner NITR

NIT Rourkela

TEAM CAPTAIN

Feb. 2016 - Apr. 2018

- My responsibility was to manage the Formula SAE team and help them design and manufacture a race ready FSAE car. I led my team in Formula Bharat 2018.

Projects

Euroclear Bank

- Euroclear is a major clearing house that settles and clears securities trades executed on European exchanges.
- I am a part of Euroclear EUI funds team which is responsible for developing their message/order handling and message processing application.
- The Application has Kafka distributed streaming platform as the middleware, in a microservice based architecture.
- The project follows the agile methodology, the stories are based on Behaviour Driven development.
- As a developer my role starts by implementing the code then performing unit testing and integration testing. Thereafter the feature file and its step implementation is completed based on the BDD stories.
