## WORK EXPERIENCE

### Project Engineer

Wipro, Bengaluru

01/2019 – Present

#### Achievements/Tasks

- ENM-Operational Procedure Support(OPS) - Have been involved in development and maintenance of OPS\_Server and OPS\_Client modules and involved in discussing the product feature with team management and solving complex problems.
- OPS provides support for the development and runtime control of MML and AP command files. Also other activities related to the user's work, such as UNIX file handling, can be performed by means of control features that can be embedded in the MML and AP command files.
- Developed APIs for clients, which helped them for migration of old legacy systems to new standard ones as well as better management of their databases and other relevant data coupled with the added feature of authority over their published and confidential data.
- Have also worked in the UI part of application to add new feature using JavaScript and JSP.
- Implemented performance tuning of applications using databases by implementing pooling of databases to reduce the calls made to external systems.
- Worked on to optimized the complex SQL queries which reduces the performance lag by almost 50%.
