WORK EXPERIENCE

Associate Developer
TransUnion

12/2019 - Present   *Chennai,India*

Project Brief

- Developed data-gathering and reporting structures from ground up using Ab-Initio and strategized methods capitalizing on system features.
- Optimized backend data sources and thereby saving up to 60% disk space and thereby enhancing the tool responsiveness by 3 times.
- Evaluated financial and behavioral trends to understand competitive environments and assess current strategies.
- Tracked KPIs and metrics specific to various organization initiatives and quantified incremental impact for the same.

Senior Systems Engineer
Infosys

08/2016 - 12/2019   *Chennai,India*

Project Brief

- **worked as a Consultant at the Client's site (Monterrey, Mexico) and was highly acclaimed by the client for setting up the analysis and reporting structure.**
- Improvised Informatica RFC method for SAP logic in place of SAP XI. The performance of Informatica was 50 times better than XI.
- Developed an optimal data pipeline using Informatica and generated automated reports via Oracle database.
- Designed integration tools to combine data from multiple, varied data sources such as RDBMS, SQL, and big data installations.
