PROJECT SUMMARY

Project #1	Small Ticketing-Fulfiment & Logistics Effeciencies
Role	Quality Analyst
Team Size	6
Client	Macys, USA
Company	Scintel Technologies
Technologies	HP Quality Center – ALM, MST-JIRA

Description:

Scope of the project is to expand and enhance supply chain technology to improve Macy's business processes and visibility for inbound to DC product movement as it relates to supply chain and DC processing. The goals are to improve core functionality, drive vendor and carrier compliance and provide better visibility to Macy's supply chain.

Responsibilities:

- Participate in Story walk through to gather & analyse requirements.
- Prepare Test Scripts for Functional Requirement.
- Defect reporting and tracking in JIRA.
- Prepare Test Summary Report.
- Co-ordinate and provide assistance to customer for UAT.

Project #2	TBW Project – The Blackwoods Way
Role	Quality Analyst
Team Size	25
Client	SYDNEY,AUSTRALIA
Company	Plan IT Technologies India PVT LTD
Technologies	Devops

Description:

TBW Project- The Blackwood's way program is a system enabled business transformation initiative. The transformation of key business processes and data management will be enabled by a new Enterprise Resource Planning (ERP) system and will be critical for Blackwoods to improve customer experience and support business growth.

The new ERP system is Microsoft Dynamics 365(a cloud based solution). The scope of the ERP program is to replace the existing legacy ERP system with Microsoft Dynamics 365(Finops and CE) for Blackwoods Australia, Indonesia and China. Additionally, the scope includes replacing the separate bullivants ERP system with Microsoft Dynamics 365, and implementing a CRM system to leverage ERP capability and improve the customer experience.

Responsibilities:

- Participate in Story walk through to gather & analyse requirements.
- Prepare Test Scenarios for Functional Requirement.
- Designing Test cases for the document.
- Raising the defect.
- Defect reporting and tracking in Devops.
- Co-ordinate and provide assistance to customer for UAT.

Project #3	AVANT
Role	Test Engineer
Team Size	7
Client	SYDNEY,AUSTRALIA
Company	Plan IT Technologies India PVT LTD
Technologies	Devops

Description:

Avant is Australia's leading medical defence Organisation with a proud heritage of protecting the Australian medical profession that spans over 125 years. Established by a small group of doctors as a mutual in 1893, Avant now represents over 78,000 health practitioners and medical students, across every state and territory. Avant has the largest and most experienced specialist medico-legal defence team in Australia. Avant travel cover is run purely for the benefit of our doctors developed on the duck creek systems.

Responsibilities:

- Participate in Story walk through to gather & analyse requirements.
- Prepare Test Scenarios for Functional Requirement.
- Designing Test cases for the document.
- Raising the defect.
- Defect reporting and tracking in Devops.
