- **Computer skills :** Familiar with Windows 8, 10, 11, Familiar with MS-Office, Google docs

PROJECT PROFILE :

- **Project 1**

  Project Name : **Outriders**
  Environment : Steam, Playstation 4 & 5, Xbox X & One, Stadia
  Tools : Jira, Testrail
  Team Size : 45
  Role : Test Engineer

➢ **Description :**

Outriders is a role-playing third-person shooter games. In the beginning of the game, players create their custom characters and choose from four classes, each of them has unique abilities that the players can utilize. The four classes include the Trickster, Pyromancer, Devastator, Technomancer. These special skills have a short cooldown time and can be combined with other skills for maximum effects. The game features a skill tree that allows players to unlock and upgrade their skills. Players can use different weapons such as shotguns and assault rifles to defeat enemies, and firearms can be customized with weapon mods.

➢ **Role and Responsibilities :**

  - Understanding the requirements and functional specification of the game.
  - Conduct Functional, Regression, Performance, Compatibility, Soak Testing.
  - Testing the game on required platforms.
  - Finding and reporting new defects.
  - Log the bug into bug tracking tool i.e. Jira.
  - Updating the regression progression using the regression tracking tool i.e. Testrail.

- **Project 2**

  Project Name : **Sims 4**
  Environment : Steam, Playstation4, Xbox One, MacOS
  Tools : Jira
  Role : QA Tester II

➢ **Description :**

Sims 4 is a strategic social simulation video game, similar to preceding titles in the series. There is no primary objective or goal to achieve, and instead of fulfilling objectives, the player is encouraged to make choices and engage fully in an interactive environment. The focus of the game is on the simulated lives of virtual people called "Sims", and the player is responsible for directing their actions, attending to their needs, and helping them attain their desires. Players control their life and explore different personalities which change the way the game plays out. "Simoleon" is the unit of currency used in the game. Players can play with pre-existing Sims and families, or create their own.

➢ **Role and Responsibilities :**

- Understanding the requirements and functional specification of the game.
- Conduct Functional, Regression, Ad-hoc Testing.
- Testing the game on required platforms.
- Finding and reporting new defects.
- Log the bug using bug tracking tool i.e. Jira.
