- Involved in daily Scrum and updated the status for each user story and impediments.

### Academic Credentials:

- Completed B-Tech at JNTU(Kakinada) University 2016 with aggregate of 64.9%
- Completed intermediate 2012 with 60%
- Completed SSC (secondary school certification)2009 with70 %

### Achievements:

- Got good appreciation from clients for effective presentation of the challenging tasks handled in the QA process for writing Test Scenarios & Test Cases for new functionality implementations.
- Handled full project of Hitwicket Superstar's game.
- Handled daily call with client to identify the risk factors and tracked the project to closure.

### Project Experience Details:

#### Project1: DAZN

Project type	: Streaming Application
Project Duration	: April 2023 to Till Date
Worked as	: Senior Software Test Engineer
Team Size	: 50

#### Project Description:

DAZN is a Streaming channel App which is available in Mobile (Android, iOS, Tablet & TV). In this App user need to take subscription to watch different types of games. DAZN is also conducting live matches & events which was only available in DAZN Channel. User can use the application in different languages in different devices.

#### Testing activities performed on project:

- Analyzing the requirement and preparing Test Plan documents for various test scenarios
- Preparing Test Matrix data for Stag & prod Environment.
- Creating test cases based on the scenarios identified and writing the negative test cases to break the functionality & executing the test cases by running sanity, stress, spam, retesting, regression testing on every possible Situation.
- Execute test cases and updating the results in TestRail.
- Perform testing on Web browsers, Android mobile/tab by accessing the STAG/PROD environments.
- Reporting bugs in JIRA tool and tracking the reported bugs.
- Perform API checks manually using Postman tool to check the request, revoke and cancel API's.
- Checking the status of the created account and subscription in Salesforce and Zuora platforms.
- Consolidate test status on daily basis and generate EOD report.
- Participating in meetings for process improvements.
- Participating in daily status calls.

**Project2: EDVANZA**

Project type : Job Application portal  
Project Duration : August 2022- to January 223  
Worked as : Software Test Engineer  
Team Size : 45

**Project Description:**

**EDVANZA** is a job Application portal App which is released in Beta Version. In this App an Employee can search for candidates who are looking for a job & A candidate can search for the jobs part-time /full-time whatever he/she wants. Edvanza is a Hybrid application which the user can use in Web & Mobile platforms. In this application not only jobs seekers a student can apply by using of this application.

**Testing activities performed on project:**

- Analyzing the requirement codes and functional program documents for identifying various test scenarios
- Creating test cases based on the scenarios identified and writing the negative test cases to break the functionality & executing the test cases by running sanity, stress, spam, retesting, regression testing on every possible Situation.

**Project 3: Microsoft**

Project type : Compatibility Testing on Microsoft Devices  
Project Duration : January 2022- to August 2022  
Worked as : Senior Software Test Engineer  
Team Size : 35

**Project Description:**

Testing on Microsoft Devices with Base OS to Latest while performing the Compatibility of the Devices. Need to test Latest Build on OS, Applications, Peripherals & Devices Testing on different types of laptop devices to ensure that either OS is working correctly or not.

**Testing activities performed on project:**

- Testing the various devices & peripherals to ensure that everything working fine.
- Testing the applications from Base OS to Upgrade OS after installing in devices.
- Creating test cases based on the scenarios & testing the applications in various scenarios.

**Project 4: EDVANZA**

Project type : Job Application portal  
Project Duration : March 2021- to January 2022  
Worked as : Software Test Engineer  
Team Size : 45

**Project Description:**

**EDVANZA** is a job Application portal App which is Released in Beta Version. In this App an Employee can search for candidates who are looking for a job & A candidate can search for the jobs part-time /full-time whatever he/she wants. Edvanza is a Hybrid application which the user can use in Web & Mobile platforms. In this application not only jobs seekers a student can apply by using of this application

#### Testing activities performed on project:

- Analyzing the requirement from the client as per the product and performing various testing techniques
- Assigning medium level tickets to juniors and helping them on their works
- Handling client calls independently to ensure where the issue existing from there side
- Creating test cases based on the scenarios identified and writing the negative test cases to break the functionality & executing the test cases by running sanity, stress, spam, retesting, regression testing on every possible Situation.

#### Project 5: XBOX Test Engineer

Project type	: XBOX Test Engineer (Game Tester)
Project Duration	: October 2020 to January 2021
Worked as	: Game Test Engineer
Team Size	: 36

#### Project Description:

**Xbox** is a console where users can play different types of games in it. Users can play games in different types of modules by using on Joy sticks, Wireless sticks & AR, VR. We need to play the game and give certification it is working fine are not as per client requirement.

#### Testing activities performed on project:

- Analyzing the requirement and play the game as per the client requirements.
- Creating test cases based on the scenarios identified and writing the negative test cases to break the functionality & executing the test cases by running sanity, stress, spam, retesting, regression testing on every possible Situation.

#### Project 6: EZ-JOBS

Project type	: Job portal
Project Duration	: November 2019 to August 2020
Worked as	: QA Mobile & Web Application Tester
Team Size	: 25

#### Project Description:

**EZ JOBS** is a job portal App which is Released in PLAY STORE & APP STORE. In this App an Employee can search for candidates who are looking for a job & A candidate can search for the jobs part-time / full-time whatever he/she wants. EZJobs is a Hybrid application which the user can use in Web & Mobile platforms.

#### Testing activities performed on project:

- Analyzing the requirement codes and functional program documents for identifying various test scenarios
- Creating test cases based on the scenarios identified and writing the negative test cases to break the functionality & executing the test cases by running sanity, stress, spam, retesting, regression testing on every possible Situation.

**Project 7: EZ-SELL**

Project type : Online Marketing Platform  
Project Duration : November 2019 to August 2020  
Worked as : QA Mobile & Web Application Tester  
Team Size : 25

**Project Description:**

**EZ Sell** is an online marketing platform App which is released in PLAY STORE & APP STORE. In this App an user buy the product or sell the product by using of this application. EZ sell is a Hybrid application which the user can use in Web & Mobile platforms.

**Testing activities performed on project:**

- Analyzing the requirement codes and functional program documents for identifying various test scenarios
- Creating test cases based on the scenarios identified and writing the negative test cases to break the functionality & executing the testcases by running sanity, stress, spam, retesting, regression testing on every possible Situation.

**Project 8: Hit-Wicket SUPERSTARS**

Project type : Game  
Project Duration : December2018-October2019  
Worked as : Game Tester and Support  
Team Size : 23

**Project Description:**

Hit-Wicket Superstars is a Game which is Released in PLAYSTORE. It is a cricket game for Cricket lovers, and it is a Strategy game. In this game users can stand as a Manager, Player, Coach etc. This application has been developed in Unity Framework.

**Testing activities performed on project:**

- Analyzing the requirement from the client writing Positive & Negative Test Cases.
- Handled complete game and performed Testing on it
- Creating test cases based on the scenarios identified and writing the negative test cases to break the functionality & executing the test cases by running sanity, stress, spam, retesting, regression testing on every possible Situation.

**Project 9: Shipment Condition File (SCF)**

Client : Railinc (North American railway transport)  
Project type : Migration from Mainframe to .Net  
Project Duration : June 2017- September 2018  
Worked as : Junior QA Engineer  
Team Size : 6

**Project Description:**

Shipment condition file application defines price qualification for shipments. It provides a privilege to the user to designate the specific shipment for his use based on accessorize services and annual volume agreement. Price of the shipment is not dependent only on the condition code; there are other parameters which decide the price of the shipment condition.

This application has been migrated to .Net from mainframe using ASP.NET framework and sql database. The objective of developing the system is to develop a stable application without losing the functionality of the existing system.

**Testing activities performed on project:**

- Writing the Test cases based on the scenarios which was given by lead Tester
- Creating the Bug Report on daily bases by end of the day
- Performing the sanity testing on the application after merging the code in loc

**Personal Profile:**

Father's Name : KoteswaraRao Immadisetty.  
Date of Birth : 30-October-1993.  
Marital status : Married  
Permanent : 2-64 Mulaguntapadu, Gandhi Road,  
Singarayakonda, Prakasam - 523101
