I am an Information Technology major, with a will to learn and enhance my skill set every day with a demonstrated history of working in the SaaS (Software as a Service) domain. I am looking for an opportunity to move into Data Science domain to enhance my skills of Data and Analytics. I like to be an individual to learn, enhance and gain experience on to this technology.

This passion carried me through my education at International Institute of Information Technology, where I am pursuing PG Diploma in Data Science with a specialization in Business Intelligence/Data Analytics.

I have a strong technology background with a degree focused in Information Technology from K.P.B Hinduja College, Mumbai.

My certifications include:

- SQL for Data Science from University of California, Davis.
- Crash Course on Python by Google.
- Google Analytics for beginners by Google Analytics Academy.
- Social Network Analysis from University of California, Davis.
- Basic Digital Marketing from Goodlife Education.
- Professional Software Testing Specialist from Squad Infotech.
- Pursuing Everyday Excel from University of Colorado, Boulder and Business Intelligence And Data Analytics: Generate Insights from Macquarie University.
