Worked in **Ray Business Technologies Pvt. Ltd, Hyderabad** from 18th Feb 2019 to 2020 Nov.

Worked in **Cedarinfotech. Pvt. Ltd, Hyderabad** from 1st Dec 2017 to 23rd Jan 2019.

Educational Details:

Bachelor of Computer Application with an aggregate of 72% from MLRIT College of Engineering and Technology (affiliated to JNTU), passed out in 2015.

Technical Skills:

IDE: Visual Studio Code, Sublime, Notepad++ etc..

Scripting Languages: JavaScript, jQuery, Angular(2-14), Rxjs, NGRX, Primeng , Angular material, HTML, CSS, Bootstrap, React basics.

PROJECTS:

PROJECT 1: HOUSE OF WELLNESS (HOW)

Client: AM Solutions, Australia.

Technologies used: Angular, jQuery, SQL Server

Team Size: 5

Description:

House of wellness is an on-premises application designed for CWH (Chemist Warehouse) stores. The store staff use this application to track the wellness of different customers who visit the stores. The staff can book appointments for different wellness services like Quit Smoking, Heart, Diabetes check, Naturopathy, Pain consultation, Baby nursing, etc. These appointments will be attended by qualified nursing staff at the stores who are called wellness warriors.

This application will be used by Admin users to configure the services and time slots for the stores. The application access is controlled through role-based authentication and authorization. The wellness warriors can generate wellness reports and emails will be sent to the customers after the appointments are complete. The application sends reminder emails for booking the review appointments.

Key Features:

- Booking of the time slot and blocking the slot for the timing.
- Connecting multiple projects with central database.
- Creation of the email and messaging templates which super admin can edit it.
- Handling large amount of data in single request response.
- Dealing with multiple databases for fetching the information from another server.
- Sending a mail for every new and review appointment.
- Parallel processing included.

Roles and Responsibilities:

- Involved in the architecture design of the project.
- Task assignment to the team and tracking the status.
- Build and Release management.
- Requirements gathering and analysis by participating in the daily scrum meetings with the onsite team.
- Performance tuning of the application.
- Involved in enhancements and modifications of application and in Bug Fixing.

PROJECT 2: PRODUCT INFORMATION MANAGEMENT SYSTEM

Client	AM Solutions Pvt Ltd, Australia
Project specific skills	Angular (9th)
Team Size	5

Description

PIMS is a Reverse Engineering project converting from windows forms to web applications. The core business functionality is rewritten retaining the database and its related functionality as it is. The activity of Product information Management System has always been at the center of a healthy retail business. Products are the roots from which all other retail activity stems, and so maintaining product information with efficiency and accuracy is crucial to business (AM Solutions and related brands - My Chemist, Chemist Warehouse etc.). This application maintains the product information of 30,000+ products, as well as adding new ones daily, costs them a significant amount of time and effort. The new system needs to support automation of current manual tasks, to improve efficiency and provide an appropriate level of usability. A solution that does this will provide maximum value for the SMS team by addressing their business needs.

Key Features:

- Bulk import with inline business validation messages in Grid
- Import and export excel operations.
- Handling large amount of data in single request response.
- Dealing with multiple databases for fetching product images from another server.

Roles and Responsibilities:

- Involved in the architecture design of the project.
- Task assignment to the team and tracking the status.
- Build and Release management.
- Requirements gathering and analysis by participating in the daily scrum meetings with the onsite team.
- Performance tuning of the application.
- Involved in enhancements and modifications of application and in Bug Fixing.

PROJECT3: AIMUNSHI

Client	AM Solutions Pvt Ltd, Australia
Project specific skills	jQuery, SQL Server, Angular
Team Size	8

Description:

Extract the data from the Pdf and based on the roles and responsibility we are showing the end user. User only select their models and create his own model by selected fields for extracting the data from the pdf. Payment subscription also option is there.

Key Features:

- Extract the data and store it in the database.
- We can drag the square box and give a certain name to that box and export those squared boxes values as well.
- Import and export excel operations.
- Handling large amount of data in single request response.
- Dealing with multiple databases for fetching product images from another server.

Roles and Responsibilities:

- Involved in the architecture design of the project.
- Build and Release management.
- Requirements gathering and analysis by participating in the daily scrum meetings with the onsite team.
- Performance tuning of the application.
- Involved in enhancements and modifications of application and in Bug Fixing.

PROJECT 4: HOPE UC APP

Client	:	Church, Hyd.
Responsibility	:	Involved complete project development both development and design.

Technology : jQuery, HTML, CSS, Angular, Ionic, Json, Bootstrap.

Role : Team Leader.

Description:

This app is used by an organization to connect with its supports and gather more support.

Features:

- Live streaming
- Volunteer registration.
- Watch videos.
- Collect donations.

Contribution:

As a Team Leader I am responsible for

- Went to the client meetings to gather the requirements.
- Requirement Analysis & Design. Prepared the document based on the requirements.
- Involved in design and development application.
- Creation of wire frame model to show the client.
- Developing the UI and UX with the help of team members
- Involved in the unit testing.

PROJECT5: NEW LIFE AG APP

Client : Church Hyderabad.

Responsibility : Involved complete project development both development and design.

Technology : jQuery, HTML, CSS, Angular, Json, Bootstrap, Ionic.

Duration : March 2017 – November 2017

Role : Team Leader.

Description: This App is used for representing a church and all the activities carried out by them.

Few Interesting features of this app are:

- Bulletin: Users can read the blog post here.
- Live Telecast: Every Sunday users can view the prayer meeting LIVE from the venue of the organization.
- Video Archives: This section contains all the videos of the organization.
- Upcoming Events: This shows all the upcoming events of the organization.
- Get in Touch: This has all the contact information of the organization.

Contribution:

As a Team Leader I am responsible for

- Produced high quality intuitive, natural, comprehensive and solid UI for the websites and web application.
- Went to the client meetings to gather the requirements.
- Requirement Analysis & Design.
- Prepared the document based on the requirements.
- Involved in design and development application.
- Creation of wire frame model to show the client.
- Developing the UI and UX with the help of team members.
- Assign the work to the team members and check the progressive status on the work.
- Involved in the unit testing.

PROJECT6: GIDEONS INDIAN ORBIT

Client	:	Church App
Responsibility	:	Involving in complete project both development and UI/UX design.
Technology	:	Angular, Html5, Css3, Bootstrap, jQuery, Json,
Role	:	Team Leader.

Description:

The main motto of this project is every Sunday live and daily messages, every Sunday Events, reporting by charts etc.

- Requirement Analysis & Design.
- Build the design guidelines and standards for the Mobile application.
- Assign the work to the team members and checking the progressive status on the work.

PROJECT7: US HEALTHGROUP

Client:	US.
Technologies used:	Angular, jQuery, JavaScript
Team Size:	16

Description:

- Coordinated with all levels of hospital and medical staff, including doctors, specialists, and nurses, to ensure healthcare needs were being addressed.
- Assisted in reviewing and monitoring hospital budget, including analysis of medical expenditures and cost overruns.
- Kept medical team and hospital staff abreast of latest governmental, agency, and healthcare association mandates and policies.

- Organized and maintained patient healthcare record system, including medical billing and visit accounting.

Roles and Responsibilities:

- . Involved in the architecture design of the project.
- . Task assignment to the team and tracking the status.
- . Build and Release management.
- . Requirements gathering and analysis by participating in the daily scrum meetings with the onsite team.
- . Performance tuning of the application.
- . Involved in enhancements and modifications of application and in Bug Fixing.

Other Projects:

Chetan Chhabra, Awesome Place, Ela Rummy, CI Files, eAgrisarathi, Vasundhara Diamond Roof, Goutam Glass, Spark10tv, JSK Creatives, Practice Pa, vinzent.my, clickatdoor.com, cocafe.in, training.cedarinfotech.com.

Extra-curricular activities:

- As an event coordinator of a national level fest, I organized Android workshops.

Area of interest:

- Object Oriented Programming Concepts.
- Software Developer
- Database Management System
- Software testing

Achievements:

- Obtained Zonal level certificates in Shuttle Cork Badminton.
- Organized school level functions and Sports meet.
- Participated in program debugging, Quiz held in other Engineering colleges and seminars.

DECLARATION:

I hereby declare that all the above information is correct and true to the best of my knowledge.

Place: Hyderabad, India

Date:

MOHD. JAMEEI
