EXPERIENCE

Rockwell Automation Inc. , Pune – *Power Platform Developer*

March 2022 - Jan 2024

- Obtaining needs from stakeholders and regional managers and completing them within the allotted period are among my roles and responsibilities.
- Weekly comprehensive project reports were given to the management to keep them updated on updates and milestones.
- Gathered and reviewed user input to enhance PowerApps functionality.

Projects:

Global lead creation:
- App developed with PowerApps Canvas App
- Created several PowerApps screens
- Created completely customized PowerApps forms
- Implemented Role based security in PowerApps
- This program has implemented multi-factor authentications. This may have additional forms and screens based upon the different regions.
- Worked on a variety of Power Automate flows, including alerts for notifications and approval flows.
- Worked on the power automate flows to moving data from SQL to DCRM.

Purchase Order Management App:

Significant technical implementation for this Project

- Several SharePoint lists were created.
- Used the PowerApps Canvas program to create an app.
- Made completely personalized PowerApps forms.
- Configure the gallery using several filters.
- Used the delegable function to handle the delegation warning.
- Infopath form was moved to PowerApps.
- Notifications were sent using triggered and automated flows.
- Included role-based security into the application.
- To make the program responsive, collections and variables were used.

BOM Management App:
- Improved Build of Material PowerApps were worked on.
- Keeping a close eye on the app.
- A few UI tweaks have been made to the app.
