Projects

KFC (Kentucky Fried Chicken), 02/2022-Present, Pune.

The Online Food Order System successfully streamlines and simplifies the food delivery process, providing customers with an intuitive online platform to browse menus and place orders effortlessly. By leveraging cutting-edge technologies, such as Dot Net Core, Microservices, and AWS, the system delivers efficient and scalable solutions to meet the demands of the food delivery industry.

My Self Care, 02/2021, 01/2022, Mumbai.

The Health Care Tech Platform is a comprehensive web application designed to facilitate seamless communication and efficient management between doctors and patients. As a Full Stack developer, my role in this project involved designing, developing, and maintaining both the frontend and backend components of the platform.

Success Gyan, 12/2019, 02/2021, Mumbai.

Success Gyan is an online academy dedicated to transforming lives and empowering households through life-changing training programs. As a Full Stack developer, I played a crucial role in designing, developing, and maintaining the Partner Program Web Application. These platforms facilitated the marketing of training events, registration of participants, tracking of commissions, and other essential functionalities for our partners.

Education

2019-06

Bachelor of Engineering

Pune University - India
