Version Control System	Git, SVN
DevOps/ Cloud Platforms	AWS (EC2, Lambda, API Gateway, SES, Route 53, S3, SQS), Apache Kafka, Docker, Retool
Packages	Rational Rose, MS Office, Libre Office
IDEs	PHPStorm, IntelliJ,Visual Studio Code, Sublime Text

PROJECTS

1. **ClearTax Products (Dec 2021 - June 2023)**

    ClearTax has multiple SAAS products in its portfolio like GST, MaxItc, EInvoice, Identity, ITR filing, Accounts Payable & many more like this, which comes under FinTech domain. These products provide end to end solution for the use cases of the customers for example GST helps filing GST on time, help client organizations do compliance checking if any thing they missed, similarly you can manage Invoices & generate invoices through EInvoice, & do ITR filing for individual & so on.

    I've got exposure to work on some of the services which are technically microservices used in multiple products & within other microservices as well.

    Technologies: NodeJs 10.x+, Python 3.x, Java 8, 11, 17, SpringBoot, MongoDb, Postgres, MySql, Redis, Apache Kafka, AWS Lambda, AWS API Gateway, AWS EC2, S3, Docker, Retool,
    Responsibilities: Microservice Arch development/ Designing & Implementation, REST APIs, third party integration, end-to-end delivery of services from scratch till production-ready deployment

2. **Medlife Labs (Jan 2019- Mar 2021)**

    An e-Diagnostics business, in order to sell packages/ tests like CBC, Thyroid Profile etc. online by either home/ lab collection preferences. Once the test sample is collected by lab technicians in lab visits or phlebotomists from home collection on the booked slot, the reports for the tests will be provided online/ offline via courier hard copy if required by the customer.

    Introduced & Implemented Automated reporting system, Created CRUD pages on the go by Retool depending on the requirements. Implemented NodeJs based Microservices Architecture for few features

    Technologies: PHP 5.6, 7, NodeJs 10.x+, Symfony, Sequelize, Doctrine, MySQL, Redis, Apache Kafka, AWS Lambda, AWS API Gateway, AWS EC2, S3, Docker, Retool, AngularJs, ReactJs
    Responsibilities: Development/ Maintenance of Admin Dashboard, REST APIs creation, LIS integration, third party integration, Microservice Arch development/ Designing & Implementation.

3. **Bistro (Bar & restaurant) Booking App (July 2019 -Dec 2019)**

    A mobile app which helps people to book bar/ restaurants from home for a meeting, party or any get together occasion, users can book tables, order from restaurant menu items, one can offer drinks to nearby users as a friendship gesture.

    Backend Admin Portals:

    1. Admin Portal: Overall Admin User portal to create Users (Admin Users, Restaurants Profiles, waiters), manage the ACL + App specific data with Register, Login features. Data reporting system also exists here.
    2. Restaurant Portal: It helps Restaurants to add products, tables, waiters, Assign Table to waiters, Auto assignment to waiters, Create festivals/ events.
    3. Waiter Portal: Accept/ reject table booking, accept payments, update order statuses (serving, served, new order items).

    Technologies: NodeJS 10.x+, ExpressJS, MongoDB, AngularJS, Pug, AWS EC2, S3
    Responsibilities: Development of REST APIs for Mobile Apps, new features, modifications based on demand, providing support for the team, Application deployment.

4. **Audio based Social N/w App (July 2019 -Dec 2019)**

   A mobile app which helps people to share info in audio clips across the globe, a user can follow/ unfollow users, flag, like, reply on content shared by followed or channel specific users, private conversations also via personal audio clips.

   Backend Admin Portal features: Show data shared based on date, place, channels, Delete Users on demand, Created custom CMS for the Website specific data.

   Technologies: NodeJS 10.x+, ExpressJS, MongoDB, VueJS, Pug, AWS EC2, S3
   Responsibilities: Development of REST APIs for Mobile Apps, new features, modifications based on demand, providing support for the team, Created custom CMS, Application deployment.

---

5. **IndiaRush (Aug 2017 – June 2018)**

   An e-commerce platform which deals with women's ethnic wear categories. I was one of the Tech team members, responsible for developing, suggesting new features, creating & implementing new features on demand. Implementing new features based on Google optimize test results.

   Lead Front End Team members. Provided support fixes for bugs, issues coming in throughout the life cycle of a live site.

   Technologies: PHP 7, jQuery, MySQL, Magento, CSS3
   Responsibilities: Development of REST APIs for Mobile Apps, new features, modifications based on demand, providing support for the team.

---

6. **Flipkart Ads (Nov 2016 – Dec 2016)**

   Flipkart ads is an end-to-end Commerce Advertising solution that lets brands engage with transacting consumers. Flipkart ads help measure results right from awareness and consideration to purchase.
   Technologies: PHP, MySQL, JS, jQuery, Wordpress 4.7, Microsoft Azure
   Responsibilities: Develop and design lead capturing and ads campaign system, Application deployment.

---

7. **Corporate Taxi (Oct 2016 – Nov 2016)**

   A vehicle tracking web application which tracks the current, previous location details of the vehicles registered in the system.

   Technologies: PHP 7, Symfony 3, Doctrine, jQuery, Bootstrap 3, Materialize, MySQL, AWS EC2
   Responsibilities: Development of Admin Dashboard, Establishing Socket communication b/w the system & vehicle tracking device, Application deployment.
