- Good understanding of Software Development Life Cycle (SDLC) and Software Testing Life Cycle
- Excellent knowledge and working experience in Automation Test Planning, Automating and Test Results analysis, Defect life cycle management, Debugging, Test Results Documentation and Release activities
- Defect Reporting and Tracking using Automation Tools like **JIRA**
- Capability of working under pressure, to meet strict project deadlines and achieve complete customer satisfaction
- Self-motivated, Positive orientation towards expanding present knowledge base, good team spirit and willing to accept challenging assignments
- Experienced in software testing in the areas of Web Based – Client server applications using Manual (**Postman**)

## PROFESSIONAL ORGANIZATIONS

- **Wipro** Chennai as **Software Engineer** from Feb 2020 to Present.

## EDUCATIONAL QUALIFICATION

- **B.E (Electronics & Communication Engineering) (63%)**, Nammakall, TN from **Gnanamani College of Technology Engineering College (2020 passed out)**.
- **12<sup>th</sup> standard**, Tiruvannamalai TN from **Sishya Higher Secondary School**.
- **10<sup>th</sup> standard**, Tiruvannamalai, TN from **AVM Matriculation School**.

## PROFESSIONAL SKILLS

- API : POSTMAN(Manual)

- Operating Systems : Windows
- Technologies : Core Java, Selenium
- Project Frameworks : POM, JUnit, Cucumber BDD, Data Driven
- Process : Agile methodology
- Build Tools : Maven
- Bug Tracking Tool : JIRA
- Version Control Tool : GIT

## PROFESSIONAL EXPERIENCE

### PROJECT 2

Methodology : Agile -Scrum  
 Domain : E- commerce – Globalize Our platforms (GOP)  
 Framework : Selenium with TestNg and Manual API Testing  
 Client : USA

#### Project Description:

This project covers the Automation of End-to-End flows in DELL for order processing through all the layers starting from Front office, Order Management, Fulfillment, Invoicing, Finance, Services, VT, Delta, Lighting etc.

#### Responsibilities:

- Analyzing and Understanding profiles wise Data as per requirements
- Identifying the test scenarios that need to be tested.
- Prepared and executed Test Cases as per System Requirements and User Stories.
- Validating the profiles from different country with respect to testing
- Actively participate in meetings like Daily standup calls, Sprint review meeting and sprint retrospective meeting.
- Involved in all levels of Agile starting from test planning to retrospective meeting.
- Regression testing and generating reports.
- Send Daily Report to Project Manager.

### PROJECT 1

Domain : Ecommerce  
Automation Tool : Selenium WebDriver, POSTMAN, Rest Assured  
Testing approach : Automation and Manual

### **Project Description:**

The store consists of various departments such as Home decors & Appliances, Health and Beauty, Clothing and Fashions, groceries and more. It includes cart management, Personal info management, Wish list management, Card payment.

### **Responsibilities:**

- Understanding the Business Requirement Specifications from BRD document
- Implementing BDD framework using Cucumber and defining the feature files along with their step definitions
- Experience In Data driven Testing, Cross browser testing and Parallel Test execution using Selenium WebDriver, TestNG and Maven
- Identifying the test cases which needs to be automated and which has to be done manual
- Knowledge in code check-in and check-out in Git
- Worked and Practiced on Agile methodology
- Execution of scripts, error handling and debugging
- Involved in Regression Testing using Selenium
- Raising the bugs by implementing defect tracking tool, Jira
- Detecting the bugs and classifying them based on the severity and reporting
- Experience in attending the status calls and reporting to the clients

### **DECLARATION**

I hereby to declare that all the information mentioned above is true to the best of my knowledge.
