Profile:

A passionate, hands-on professional, I have over 7 years' experience in application development covering multiple technologies. I keep a top of new developments within the industry and can adapt quickly to new coding conventions. I am happy working independently or in a close team environment, and apply a positive attitude to every task I undertake.

Summary of Skills:

- 7+ years of professional experience in web application development
- Passionate about giving best design and following coding practices
- Good in managing time and organizing tasks
- Career oriented, hardworking and ability to handle multiple tasks
- Quick learner and ability to learn new concepts

Technical Skills:

- **Front End Technologies**: **Angular**, NgRx, RxJs, **React**, Next.js, Redux, React Hooks, **Ionic,** Typescript, JavaScript, jQuery, Ajax, HTML5, Css3, Json, Bootstrap**.**

- **Back-End Technologies: Node.js,** Express.js, Nest.js, C#, **.Net Core**, Web APIs, MVC, **Rest APIs**,

- **Data Bases:** MySQL, MongoDB, Firebase**.**

- **Other:** AWS, Azure DevOps, Docker, CI-CD, GitHub, Trello, Jira

Education:

- **2013- Chandigarh University**
  B.Tech- **IT**.

PROJECTS:

❖ **Project Name: Authorify**   **(Aug'22-Jun'23)**

URL   : **https://authorify.com/**
Role   : Full Stack Developer.
Technologies   : React, JavaScript, Typescript, C#, Asp.Net Core, Entity Framework, MySQL, web services

Description:

This SaaS platform helps real estate agents position themselves as trusted authorities using the Authorify digital marketing platform.

Responsibilities:
- Design and develop user interfaces with React, Redux, and TypeScript
- Build the front-end of applications through appealing visual design
- Develop and manage well-functioning databases
- Implement functionalities and features using React Hooks
- Write effective APIs
- Test software to ensure responsiveness and efficiency
- Troubleshoot, debug and upgrade software
- Create security and data protection settings
- Build features and applications with a mobile responsive design

❖ **Project Name: FOOZ** **(Oct'21-Aug'22)**

URL : **https://playfooz.com/**
Role : Senior Full Stack Developer.
Technologies : CSS3, React.js, Typescript, C#, Asp.Net Core,HTML5, Entity Framework, Redux,MySQL, web services.

Description:
This is the first cash-based play-to-win platform in the Middle East and North Africa, and are fully licensed and regulated by the MGA.

Responsibilities:
- Work on the redesign of an existing web application
- Focus on fast, iterative & agile development
- Develop user interfaces using Typescript, React.js, HTML5 and CSS3
- Ensure performance, scalability, availability & security in everything
- Work with the backend team to implement existing APIs for a web (React) app
- Write effective APIs
- Utilize various React tools such as Reactstrap and Flux to manage complexity, data, and performance
- Test software to ensure responsiveness and efficiency
- Troubleshoot, debug and upgrade software

❖ **Project Name: SYNCCOS** **(Dec'20-Oct'21)**

URL : **https://synccos.com/**
Role : Software Developer.
Technologies : Angular 12, React, JavaScript, RxJs, Node.js, MongoDB,Redux, Docker, RestAPIs, Material UI, JWT, JSON, html5,Css3

Description:
Cloud based platform offering data syncing and management solutions. It provides a business intelligence platform that offers software for creating accountability, connectivity, and productivity in the service business with a comprehensive system built for users.

Responsibilities:
I worked on developing both front- and back-end systems for the entire web app. writing code for front-end web app features and interactions, as well as developing databases and services for back-end functionality Involved in design development by using MVC architecture.

❖ **Project Name: WisdomJob** **(Mar'18-Dec'20)**

URL : **www.wisdomjobs.com**
Role : Programmer.
Technologies : Angular, JavaScript, jQuery, MySQL, Asp.Net MVC, Ajax, html5, css3, web services.

Description:
It is a job search portal; it provides the information to the jobseekers who want job information, also employers, job search, skill test, e-courses, and online exams.
The Employment Job Portal application has been developed for the online registration of private employers, submission of vacancy information, searching and sponsoring of candidates, entry of interview and joining status of selected candidates etc.

Responsibilities:

- Design and develop the user interface using different web technologies.

- Develop the web services and integrate with the application.

- Develop the modules which involves Database Structure, Database programming, Forms, Reports, Web

  Servicing, Window Services and Business Logic Component.

- Implement security to protect data from unauthorized users.

- Debug and troubleshoot issues related to codes

❖ **Project Name: Nearstate** (Jun'17-Mar'18)

URL :**www.nearestate.in**
Role : Programmer.
Technologies : Asp.Net Web APIs, C#, Angular, JavaScript, jQuery, ajax, html5, css3, google API's

Description:
It is a real estate search engine portal, it provide service to the customers who needs information about the properties like buy or rent of residential, commercial house, apartments, buildings and agriculture lands etc. This application. Provide the free service to the users to post their property information in redial website, it also provides users to search desire properties by city, location, property type, bedrooms etc.

Responsibilities:

- Requirement gathering and specifications.
- Customizing the Admin Interface and Frontend.
- Database design, developing the required modules.
- Client side and server side validation is performed.
- Troubleshooting and Support For Testing
- Ensure the overall quality of all the deliverables
- Produced test report.
- Implement using OOPs concept.
- Recharge card system.

❖ **Project Name: AltiusDirectory** (Dec'17-Jun'17)

URL :**www.altiusdirectory.com**
Role : Programmer.
Technologies : React, Redux, React Hooks, Node.js, MongoDB, Express.js, GraphQL, Apollo.

Description:

This is a classifieds based applications, main aim of this application is provide information about main categories like entertainment,lifestyle,money,travel,sports,society,news,articles est

Responsibilities:
- Converted abstract specifications into executable code.
- Responsible for unit and integration testing of various modules.
- Developed backend for daily update content for all categories and allow to writing articles.
- Database design, developing the required modules.
- Client side and server side validation is performed.
- Provided static search for users
- Implement using oops concepts

❖ **Project Name: HappySup** (Aug'17-Dec17)

URL : **www.happysup.com**
Role : Full stack Developer
Technologies : Angular, Asp.Net Core, React, C#, TypeScript, Rest APIs, Docker, MySQL.Redux
Description:
This is an US based classifieds applications. This application used to provide the updated information of the US country chefs based on user location, this application provides services like meals availability, Breakfast, Dinner, Late night, Lunch etc. Also provide the distance, date wise chef search. User can choose the nearest chef and he can order meals
Responsibilities:
- Developed across all the layers of a .Net application.
- Database design using MySQL, developing the required modules.
- Client side and server side validation is performed.
- Implemented complex React Components, writing code with React best practices.
- Built reusable components and front-end libraries for future use.
- Ensure the overall quality of all the deliverables
- Provided map search.
- Development using OOPs concept

❖ **Project Name: Ship2India** **(Mar'17-Aug17)**

URL : **www.ship2india.com**
Role : Angular Developer
Technologies : Angular, NgRx, RxJs, Angular CLI, Material UI, JavaScript, TypeScript, HTML, CSS.

Description:
This is an goods shipping application. The main aim of this application is tracking the goods. If any user wants to ship or move from one location to another location just he will give a quote in website.

Responsibilities:
- Requirement gathering and specifications.
- Customizing the Admin Interface and Frontend.
- Database design, developing the required modules.
- Client side and server side validation is performed.
- Troubleshooting and Support For Testing
- Ensure the overall quality of all the deliverables
- Produced test report.
- Implement using OOPs concept.

❖ **Project Name: Cremation** **(Sep'16-Mar-17)**

URL : **www.cremationurnsashes.com**
Role : Angular2+.Net Developer
Technologies : C#, Asp.Net Web APIs, Entity framework, Angular 2, JavaScript
Description:

This application offers you affordable urns to save memorial ashes of your loved ones. Cremation urns ashes offers different types of personalised urns at discount prices, such as Full-size Large urns, Keepsake Small urns for adults to hold the full/token ashes, pet ash urn, keepsake child urns, mini baby urns, cremation jewellery urns

Responsibilities:
- Developed all the modules using Asp.net Web APIs.
- Customizing the Admin Interface and Frontend.
- Database design, developing the required modules.
- Client side and server side validation is performed.
- Troubleshooting and Support For Testing
- Ensure the overall quality of all the deliverables
- Produced test report.

❖ **Project Name: Synechron** **(Jan'16-Sep16)**

URL : **https://www.morganstanley.com/**
Role : .Net Developer
Technologies : C#, Asp.Net Web APIs, Entity framework

Description:

It is their internal system that their Financial advisors used for new client onboarding which helps
them to automate the onboarding process for their clients.
Few key features included–
- One system to cater all type of account opening process.
- Helps to automate the stuff and require minimal human intervention.
- All guidelines/required details are now at a single location
- Generating reports based on the different criteria

Responsibilities:
- Understood and analyzed the client requirements.
- Involved in client communication for day-to-day priorities.
- Worked over wire framing of screens and designs.
- Implemented API for Challenge Module
- Worked on better utilization and improvement in the performance of the application

❖ **Project Name: Enact System** (Jun'15-Jan'16)

URL	: https://enact-systems.com/
Role	: MERN Stack developer
Technologies	: React, React Hooks, Redux, TypeScript, HTML5, CSS3, Node.js, Dev Express, Nest.js,Azure DevOps, CICD, AWS S3, AWS Lambda, Git, JIRA, Docker.

Responsibilities:

- Assisting the development of Applications and Features that will be part of the Enact Platform
- Figma designs and converting them into pixel perfect UI with React
- Maintain& optimize existing features for improved performance
- Collaborate with back-end developers and product managers to improve the usability
- Find and address performance issues
- Participate and contribute to Coding best practices, Approach documents & Code reviews.
- Implement responsible web design principles using React and Node.js with GCP to ensure that our company website renders well across multiple devices
