Work History

Software Engineer (1 year)

Instawork, Bangalore, Karnataka

July 2019 - June 2020
- Developed an internal tool to onboard (Approve, Reject, Review documents like certificates etc and work experiences) Instawork professionals using Django
- Used ElasticSearch for optimizing user-based search (Name, Company, Roles, Work Experience, etc.) on the internal tool
- Implemented Iterable campaigns for emailing and messaging
- Conducted unit testing to deliver optimal browser functionality
- Wrote scripts for bug fixing (eg: Remove duplicate experiences (introduced as a UI bug earlier) of Instawork professionals to handle the error in calculating tenure.)

Software Engineering Intern (6 months)

Wells Fargo, Hyderabad, Telangana

January 2019 - June 2019
- Developed an Adaptive Web page using React js
- Maintained existing applications and designed and delivered new applications.

Backend Intern (2 months)

Profectus Solutions, Bangalore, Karnataka

May 2018 - July 2018
- Web Scraping using Python: The idea was to scrape product details from various e-commerce websites and correlate them to obtain valuable information
- Technologies used: Python, MySQL, Pupeteer, Node js
