Project:

Title: **Leankor** (Visual Work Management Solution)

Duration: Working on this project since February 2019

Description: The Salesforce Application has been implemented in Force.com and JavaScript framework like Ext.js, Bryntum and Snecha as visual project management tool which is based on agile methodology. The Application manages work management with easy steps and different views like Calendar view, Kanban view and Gantt view.

Roles and Responsibilities:
- Worked on various Salesforce.com customizations - Standard Objects and creation of customized business objects, fields.
- Configuring Objects, Fields, Relationships and Record Types.
- Created Salesforce Pages and Controllers for modules using APEX and Visual force.
- Developed batch classes for the business requirements.
- Developed Lightning Components and pages to implement the custom functionality.
- Worked with standard salesforce.com standard objects like Accounts, Contacts, Opportunities
- Worked on Apex Triggers, Batch Class, Test Classes and Visual force pages as per the need of business requirements.

- Involved in developing test classes to improve the code coverage.

- Written Apex Triggers and Efficient SOQL Queries.

- Converted Visual force pages into Lightning pages.

- Following Agile methodology (Sprints)

Certifications:

- **Salesforce Certified Platform Developer I (Credential Id-21263766)**
