WORK EXPERIENCE

Software Engineer (2+ years)

Webkul Software

01/2019 - Present

Noida Sec-63

Working on API and Full Stack development. Created CMS APIs for multiple clients, on SPRING REST, for integration on Mobile Applications and for Web. Created Marketplace Solutions, CMS according to the client's specific business requirements. Working on JSP and SERVLET technology, for full stack development, also working on Spring REST and Spring MVC with Thymleaf for frontend.

Intern

Naustone Trades

A startup organisation, I worked on the Web Development, and frontend using CSS, jQuery, and bootstrap for design. I worked on transforming the site into a Python based web framework (Flask)

NOTABLE PROJECTS

Marketplace CMS

- Creating a marketplace and a CMS for mobile and web application, comprising of buyers and sellers, managed by the administrator. The project comprised of a mobile app, and web UI. I worked on the SPRING REST application, for providing the APIs for the marketplace.

Store Management System

- Created web based book store/library management system, inventory management, learning system like Udemy, and various solution on JSP and SERVLET for multiple client projects.

Amazon Connector and Shopify Connector

- Worked on development and integration of a ecommerce platform for client's need to connect Amazon connector and Shopify connector on a single Servlet application, allowing product import / export with these ecommerce platforms.

Hyperlocal Marketplace

- Created hyperlocal based online marketplace, serving according to selected location, comprising of end to end functionality for buyer and the seller, managing inventory and the cash flow, along with integrated payment methods.

Moodle Connector integration

- A learning management system, that fetched the course, and their categories details from Moodle application(SAAS based) and integrating them for use, in SPRING environment, according to the needs.
