

Sai Krishna Kamireddy

Python Developer

An ambitious, tech enthusiast aiming for a career opportunity with an organization offering a challenging role. I have 3+ years of experience in developing and enhancing Enterprise Applications using technologies like Python, Django, Pyspark.

Experience

Loginsoft: from Jan 2020

- Working as python developer which involves security research, plugin development, unit testing, scanning, data analyzing and deploying.
- Role: Team Lead, Agile Methodology
- Client: Bitsight Tech
- Technologies used: Python, Security, Pyspark, AWS, Git, Docker.
- Role: Security research on vulnerability requested by customer or vulmon board latest trends. Develop python plugin to capture vulnerability and related info, unit testing and scanning on development clusters following analyzing scan data using Pyspark and proceeding to production deployment.

HCL Technologies: Oct 2017 to Dec 2019

- Developed REST APIs using Python, Django and PySql.
- Role: Senior Software Engineer
- Client: Syneos Health.
- Technologies used: Python, Django, AWS, Git.

 Bachelor of Technology
Electronics and Communication
Engineering
(2011-2015)
R.M.K Engineering College
