X	CBSE	Jawahar Navodaya vidyalaya, Chhan, Tonk (Rajasthan)	2008

Projects

I have worked on following projects.

1. Viome (Oct 2019 – till now)

Customer : Naveen Jain
Environment : Salesforce Platform, Java, Sales/Service/Marketing cloud
Team Size : 10+

Description :

Viome is a health company that has the goal of discovering predictive biomarkers in order to get rid of all diseases. The company was founded by Deepak Savadatti and Naveen Jain in 2016, in Los Alamos, New Mexico, USA. Viome's pioneering artificial learning engines are designed to not only analyze your data, but to aggregate all the biological data we receive. As the sample size grows, our machines will spot trends and influences, which will unlock scientific breakthroughs.

We have developed the Rest API which is consumed by the java application and posted data into the salesforce. Data moves from salesforce to marketing cloud through marketing cloud connector. In the Marketing cloud we have created multiple marketing cloud journeys for sending email to our customers based on User, Orders, Kit, Sample, Subscription and subscription based order, supplements events.

Role : Marketing cloud senior developer/consultant

Tools / Technologies Used :

- Technologies - Apex, Triggers, Rest API, service cloud, Profiles, Apex Batches, marketing cloud, journeys, templates, contact builder, automation studio, connected app, Marketing cloud connector.
- Project Management – Jira, Slack
- Others – Git, Visual Studio code, Source Tree.

Responsibilities:

- Feature Development for various clients of Traction.
- Production support by Bug Fixing.
- Development journeys, email templates, data extensions, automations, real-time and scheduled journeys and optimize business logic, Provides best solution to achieve a new functionality.
- Have best team coordination with dev, other platforms dev and QA Team.

2. RingDNA Sequence (Dec 2018 – Sep 2019)

Customer : Jeff Shelton
Environment : Salesforce Platform
Team Size : 10+

Description :

Building sales cadences in Salesforce is an effective way to streamline your lead response or prospecting efforts.

To stay competitive, using a [sales cadence](#) (also called a [sales sequence](#)), or automation of sales messaging, is no longer just an option. Today, it takes an average of eight touches before a sales rep makes contact with a lead. These touches need to take place across three or more channels (phone, email, social), at different times of day to keep up with buyer preferences.

Without the power of cadencing, it is extremely difficult for a sales rep to reach the right person at the right time, in the right place, and with the right message, across the hundreds of prospects they are expected to work every week. Sales reps need a systematic, organized prospecting schedule that prioritizes their work every day.

Role : Senior Developer

Tools / Technologies Used :

- Technologies - Apex, Lightning component, Triggers, Rest API, Profiles, Apex Batches, Scheduler, Queueable.
- Project Management – Jira, Slack
- Others – Git, Visual Studio code, Source Tree.

Responsibilities:

- Feature Development for various clients of Traction.
- Enhancement of the code coverage by unit test classes
- Production support by Bug Fixing.
- Development batch class and scheduler and optimize business logic, Provides best solution to achieve a new functionality.
- Have best team coordination with dev and QA Team.
