A Self- Motivated, Team Player and a Dedicated Individual with an Analytical Mindset.

ACADEMICS QUALIFICATION:

Maharashtra Institute of Technology , Pune (2011-2015)

Bachelor of Engineering, Information Technology
Aggregate percentage: 73.26

TECHNICAL PROFICIENCY:

- Salesforce Development
- Language: Apex, JavaScript, Java, HTML, Basic Python, SQL
- Software Tools: Visual Studio, Eclipse IDE, GIT
- Operating Systems: Windows
- Framework: Lightning, MVC

CERTIFICATION:

- Salesforce Platform Developer 1

Ajinkya Nichat

Email: nichatajinkyaa@gmail.com
Contact No: 8975889707

PROFESSIONAL SUMMARY:

- *6+ years of experience in Salesforce and Java development.*
- *Experience building Aura and LWC, Apex classes, Custom Objects, Reports, Dashboards, Tabs, Tags and Components*
- *Experience in Sales and Service Cloud*
- *Hand on experience with Apex Language, Apex Trigger, Apex Class, Asynchronous Apex, Lightning Components and Lightning Web Components*
- *Expertise in Force.com technology stack: APEX, Visual Force, SOQL, SOSL*
- *Understand and Identify relationships and converting to Salesforce custom objects, lookup relationships, junction objects, master-detail relationships*
- *Worked extensively on various salesforce.com standard objects like Accounts, Contacts, Opportunities, Products, Cases, Leads, Campaigns, Reports and Dashboards.*
- *Created page layouts, lightning record pages, search layouts to organize fields, custom links, related lists and other components on a record detail and edit pages*

Project: *BV Wizard*
Technology/Area: *Salesforce admin tools, LWC, Aura, Apex Class, Asynchronous Apex, Config*

- *Developed Aura and LWC components.*
- *Developed Metadata and configure it show related questionnaire on the LWC.*
- *Developed Tests.*
- *Built an asynchronous apex to update contacts with the last connect dates whenever an activity involving that contact is created and or updated.*
- *Currently salesforce supports Last Activity Date in such scenario only for the first contact on an activity, this async apex takes care of ALL the other contacts as well.*

Project: *Call Scheduler Refactoring*

Technology/Area: *Salesforce admin tools, Salesforce Dev*

- *Developed batch classes and scheduling it.*
- *Developed triggers to meet business requirements.*
- *Developed test classes to cover the apex code written.*

Project: *USWM*

Technology/Area: *Salesforce admin tools, LWC, Aura, Apex Class*

- *Built a complex LWC that is supposed to mimic a related list but this related list is for records that are not directly related to the one user is viewing. For example a related list on Account that shows all the Tasks & Events of all the contacts related to the account.*
- *Used custom metadata to make the component reusable so when it's needed for any other object/related list combo then the developer just has to add a few records in metadata and add one method in the controller class.*
- *From there on even if a column needs to be added or replaced or an order needs to be changed then everything is handled through metadata. No coding changes are required.*

Project: *Specialty Customer Segmentation*
Technology/Area: *Salesforce admin tools, Salesforce Development*

- *Development of Visualforce pages.*
- *Development of apex classes to meet business functionality.*
- *Development of configuration side changes such as new object, custom settings, documents etc. Deployment and validation using Ant scripts.*
